CRIME FACTORS

The presence of crime in our Nation's communities is a serious concern not only of the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. However, no definitive conclusions have yet been reached. Instead, a number of factors affecting the volume and type of crime that occurs from place to place have been delineated. Some of these are as follows:

Density and size of community population and its surrounding area.
Variations in composition of the population, particularly age structure.
Stability of population with respect to transient factors.
Economic conditions, including job availability.
Cultural conditions, such as educational, recreational, and religious characteristics.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
Attitudes of citizenry toward crime.
Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on police statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. The reader is, therefore, cautioned against comparing statistical data of individual communities solely on the basis of their population size.

FOREWORD

Fifty years ago, the International Association of Chiefs of Police (IACP) initiated the Uniform Crime Reporting (UCR) Program, which was designed to measure criminal activity throughout the United States. The task was formidable. It was not possible to compile national statistics merely by cumulating state statistics. Each state had a different criminal code, and crimes with similar elements were often given different labels.

The IACP overcame that obstacle by putting aside the states' nomenclature and by establishing instead uniform definitions for various crimes. For example, an "unlawful entry of a structure to commit a felony or theft" was treated as a burglary even if it occurred in a state where the use of force and entry at night were also elements of burglary. This use of uniform definitions enabled the UCR Program to measure criminal activity nationwide.

The IACP developed the UCR Program, but the complexity of nationwide data gathering and the importance of the UCR's findings to the Federal Government and the Nation as a whole militated in favor of greater Federal involvement. Accordingly, in 1930, Congress directed the Federal Bureau of Investigation to administer the UCR Program.

Although many technical improvements have been made during the last 50 years, the basic concept of the UCR Program—collection of data on criminal activity throughout the country—remains the same. The use of UCR data, however, has greatly expanded. UCR was designed to be a management tool for law enforcement executives. However, now—because of the growing recognition that the measure of criminal activity is relevant to a wide variety of fields—legislators, academicians, and other students of the crime problem have come to rely on the *Uniform Crime Reports.*

The FBI is proud to have the opportunity to serve the American public as administrator of the UCR Program. We do not relish exposing the darker side of society's behavior, but a better understanding of our crime problem—which the UCR Program facilitates—may enable us to be more effective in our battle against crime.

SECTION I

SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

Through the voluntary contribution of crime statistics by over 15,000 law enforcement agencies across the United States, the Uniform Crime Reporting (UCR) Program provides periodic assessments of crime in the Nation as measured by offenses coming to the attention of the law enforcement community. To generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management is the Program's primary goal. However, data emanating from the Program are widely utilized by other criminal justice professionals, legislators, and scholars who have an interest in the crime problem. Additionally, the statistics have historically furnished the general public an indication of fluctuations in the level of crime in our society.

Historical Background

The Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP) initiated this voluntary national data collection effort in 1930. That same year, the Congress of the United States appointed the Federal Bureau of Investigation (FBI) as the national clearinghouse for statistical information on crime. Since that time, data based on uniform classifications and procedures of reporting have been obtained from the Nation's law enforcement agencies.

In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that come to the attention of law enforcement agencies, since these data were more readily available than any other reportable crime information. Seven offenses, because of their seriousness, frequency of occurrence, and likelihood of being reported to police, were initially selected to serve as an Index for evaluating fluctuations in the volume of crime. These crimes, known as the Crime Index offenses, were murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in late 1978.

To provide nationwide uniformity in the reporting of data, standardized definitions were adopted for all offenses. Such standardization was necessary to overcome the variations in definitions of criminal offenses in different sections of the country. Without regard for local statutes, reporting agencies are required to submit their data in accordance with the UCR definitions of offenses as set forth in Appendix II of this publication. Because of variances in punishment for the same offenses in different state codes, there is no possibility in a program such as this to distinguish between felony and misdemeanor crimes.

The Committee on Uniform Crime Records, IACP, continues to serve in an advisory capacity to the FBI concerning the operation of the UCR Program. In this connection, the IACP, through surveys of law enforcement records and crime reporting systems, plays an active and effective part. The National Sheriffs' Association (NSA) in June, 1966, established a Committee on Uniform Crime Reporting to serve in an advisory role to the NSA membership and the national UCR Program. This Committee actively encourages sheriffs throughout the country to fully participate in the Program.

Also active in promoting interest in the UCR Program are committees on Uniform Crime Reporting within state law enforcement associations. These committees foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the need exists.

Methods of Data Collection

UCR Program contributors compile and submit their crime data in one of two means: either directly to the FBI or through their state UCR Programs. Those which submit directly to the FBI are provided, on an individual basis, continuing guidance and support from the national Program.

Presently, there are 47 operational state-level UCR Programs which have been very effective in the attainment of increased coverage of law enforcement agencies due to state mandatory reporting requirements. These agencies are also able to provide more direct and frequent service to participating law enforcement agencies and to make information more readily available for use at the state level. These state-level agencies have resulted in vastly more efficient operations at the national level.

With the development of a state UCR Program, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Instead, completed

information from these agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to the national Uniform Crime Reports' standards, definitions, and information required. These requirements, of course, do not prohibit the state from collecting other statistical data beyond the national collection. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program efforts, the FBI continues its internal procedures of editing and reviewing individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. These training sessions are, of course, coordinated with the state agency. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Each month, law enforcement agencies report the number of Crime Index offenses (murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson) that become known to them. A count of these crimes, which are also known as Part I offenses, is taken from records of all reports of crime received by law enforcement agencies from victims, officers who discovered the infractions, or other sources.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" in Part I is reported to the FBI whether anyone is arrested for the crime, the stolen property is recovered, or prosecution is undertaken. Additionally, each month law enforcement agencies report the total number of actual offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the physical arrest of an offender. Other monthly submissions on the Part I crimes include the number of clearances which involved only offenders under the age of 18; the value of property stolen and recovered in connection with Part I offenses; and detailed information pertaining to criminal homicide.

The age, sex, and race of persons arrested are reported monthly for both Part I and Part II offenses by crime category. Part II offenses, while excluding traffic violations, include all other crimes except those classified as Part I.

Various data on law enforcement officers assaulted or killed are collected on a monthly basis. Other law enforcement employee data, specifically the number of full-time sworn officers and other personnel, are reported as of October 31 of each calendar year.

Editing Procedures

Since data reliability is a matter of high priority to the UCR Program, each incoming report is reviewed not only for arithmetical accuracy but for deviations which may indicate reporting errors. The experiences of similar agencies or the crime levels established by the reporting agency's previous submissions are periodically compared with each agency's reports in an attempt to ascertain any unusual fluctuations in the crime counts.

Variations in reported crime levels and ratios may indicate possible incompleteness in reporting or changes in reporting procedures. Necessary arithmetical adjustments or noted deviations are brought to the attention of the submitting agency through correspondence. Not only are individual reports studied, but periodic trends for individual reporting units are prepared and evaluated. As a standard procedure, crime levels for each reporting agency are analyzed five times a year by the FBI. Any significant increase or decrease is made the subject of a special inquiry to the contributing agency, either directly or through its state Program. The communications containing these inquiries specifically direct attention to possible changes in records or reporting procedures. When it is found that crime reporting procedures are in part responsible for the difference in the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from the trend tabulations.

In addition to its internal data verification practices, the UCR Program endeavors to maintain statistical validity by providing training seminars and instructional materials in UCR procedures. Throughout the country, the FBI

conducts UCR seminars and workshops for law enforcement personnel, during which national and state UCR Program personnel enlist the cooperation of new contributors and explain the purpose of the Program and the methods of assembling information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

As a further aid, all contributing agencies are supplied with the *Uniform Crime Reporting Handbook* which details procedures for classifying and scoring offenses. Also, since a good records system is essential for accurate crime reporting, the FBI makes available the *Manual of Law Enforcement Records* which can serve as a guide in the establishment of a sound law enforcement records system.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program Bulletins are utilized to explain revisions in the Program, as well as present information and instructional material. Newsletters are produced periodically as needs arise.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or Committee on Uniform Crime Reporting of the NSA.

Reporting Area

One method of analyzing the statistics submitted to the UCR Program is the presentation of data by reporting areas. Geographically, the United States is divisible by regions and divisions. Further breakdowns by city size rely on population figures and proximity to metropolitan areas.

A Standard Metropolitan Statistical Area (SMSA), generally, is made up of a core city or cities with a combined population of 50,000 or more and the surrounding county or counties which share certain metropolitan characteristics. "Other cities," most of which are incorporated, are those outside SMSAs. For crime reporting purposes, rural areas are made up of the unincorporated portions of counties outside urban places and SMSAs. As a general rule, sheriffs, county police, and many state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits (urban places).

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with less than 50,000 inhabitants together with counties which are within an SMSA. In this context, the major core city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1979, the law enforcement agencies active in the UCR Program represented 99 percent of the United States population living in the SMSAs, 96 percent of the population in other cities, and 94 percent of the rural population. When considering the national population, as estimated by the Bureau of the Census, the combined coverage accounted for 98 percent of the total.

Most United States law enforcement agencies submit crime reports to the UCR Program. However, each tabular presentation in this publication shows the extent of population coverage represented by the data included.

More detailed information concerning the geographical entities used in this publication can be found in Appendix III.

Population Data

To compute crime rates for the Nation, states, SMSAs, and geographic divisions and regions, population estimates by the Bureau of the Census as of July 1, 1979, were used. Population estimates for individual cities and counties were prepared using Bureau of the Census figures for 1977 and 1978, which were then updated by the UCR Program's staff. The estimated United States population increase in 1979 was 1 percent over 1978.

Offense Estimation

Tables 1 through 5 of this publication represent total crime in the United States. Because some law enforcement agencies submit fewer than the solicited 12 months of offense reports during a given year, crime counts for use in the above-mentioned tables are estimated for these agencies. Offense estimation occurs within each of three areas: Standard Metropolitan Statistical Areas, other cities, and rural areas. Assuming that nonreporting areas have the same proportionate crime experience as those which did provide data, estimates are based on the reported crime experience of similar areas within a state.

Crime Trends

A further means of studying crime throughout the Nation is to examine trends. Percent change tabulations presented in this publication are homogeneous to the extent that only figures for reporting units which have provided comparable data for the periods under consideration are included. Exclusions from trend computations are made when figures from a reporting unit are not received for comparable months or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures.

The current year's reporting is the most complete in terms of volume. Valid 2-year trends in Uniform Crime

Reports may be used to cumulatively establish long-term trends. In addition, these year-to-year trends can be applied as the basis for reestimating the volume of crime and in reconstructing crime trends for prior years.

The most reliable reports available for the current year are found in the crime rate tables by state and Standard Metropolitan Statistical Area. Care should be exercised in any direct data comparisons with statistics in prior issues of *Crime in the United States.* Changes in the crime level may have been due in part to improved reporting or records procedures, redefinition of reporting areas, or other variables.

Recent Developments

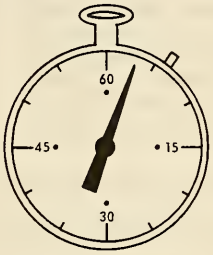
During the course of the 1979 crime reporting year, an arson data collection form was designed and implemented in compliance with the congressional mandate that arson be classified as a Part I, Crime Index offense. Although initial participation in the submission has been encouraging, much of the 1979 data is incomplete and thus unpublishable.

Every effort is being made to increase participation, as well as accuracy, in the reporting of arson offenses, arrests, and other related information. The overall goal is to achieve a level of data credibility equivalent to the other seven Index crimes. Once that level of confidence in the data is attained, arson information will be completely integrated into all aspects of the UCR analysis and publication efforts. In the interim, limited arson statistics are being published whenever completeness and reliability permit.

Beginning with the 1980 data collection, limited ethnicity information is being solicited regarding persons arrested and the victims and offenders in murder offenses. The change in reporting was made in accordance with standard classifications established by the Office of Management and Budget for all Federal administrative reporting and statistical activities. In addition to the ethnic designations of Hispanic and not Hispanic, revised race designations encompassing White, Black, American Indian or Alaskan Native, and Asian or Pacific Islander are being implemented.

In an attempt to achieve optimal utilization of its data, the UCR Program launched an analytical crime research effort in 1979. As an initial step, historical UCR crime and arrest data were used to conduct a series of analyses aimed at identifying long-term crime and arrest patterns. Appendix IV of this publication is a result of that endeavor. In the coming years, the UCR Program plans to continue expanding its analytical capabilities and to perform analyses in a number of substantive areas.

CRIME CLOCK
1979



one
CRIME INDEX OFFENSE
every 3 seconds

one
VIOLENT CRIME
every 27 seconds

one
MURDER
every 24 minutes

one
FORCIBLE RAPE
every 7 minutes

one
ROBBERY
every 68 seconds

one
AGGRAVATED ASSAULT
every 51 seconds

one
PROPERTY CRIME
every 3 seconds

one
BURGLARY
every 10 seconds

one
LARCENY-THEFT
every 5 seconds

one
MOTOR VEHICLE THEFT
every 29 seconds

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II

CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as in all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides, which are the killings of felons by law enforcement officers in the line of duty or by private citizens; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

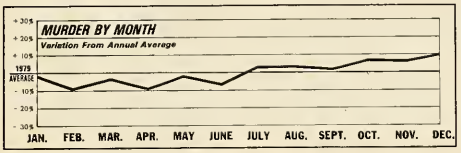
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*19,555*	*9.0*
1979	*21,456*	*9.7*
Percent change	+9.7	+7.8

Volume

In the United States during 1979, there were an estimated 21,456 murders representing approximately 2 percent of the total violent crimes.

A geographic breakdown of murder by region revealed that 42 percent of the murders occurred in the Southern States, which account for the largest regional population. Twenty-one percent were reported by the North Central States; 20 percent by the Western States; and 17 percent by the Northeastern States.

December had a higher frequency of murder offenses in 1979 than any other month of the year.

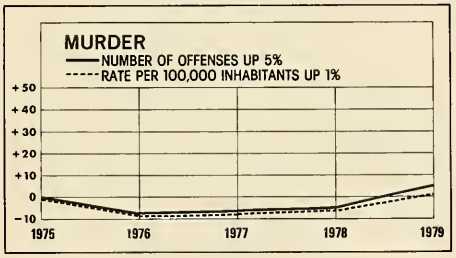


Trend

Nationally, the number of murders increased 10 percent from 1978 to 1979, and all four geographic regions registered upswings. The Southern States reported a rise of 11 percent; the Northeastern and Western States, increases of 10 percent each; and the North Central States, a 7 percent upturn.

Also experiencing increases in the number of murders in 1979, the suburban areas and large core cities of 250,000 or more people recorded 7 and 14 percent upswings, respectively. In the rural areas, the volume of murders was down 2 percent.

The following chart reveals an increase of 5 percent from 1975 to 1979 in the murder counts.



Rate

In 1979, there was an average of 10 murder victims for every 100,000 inhabitants in the Nation.

The number of murder victims in relation to population was highest in the Southern States with 13 murders per 100,000 inhabitants, a 9-percent rate increase over the previous year. The Western States' rate was 10 per 100,000, a 7-percent rise over the 1978 rate. Both the North Central and Northeastern States experienced rates of 8 per 100,000 population; however, the Northeast's rate represented a 10-percent increase, and the North Central Region's rate a rise of 7 percent.

Collectively, the SMSAs reported a murder rate of 11 victims per 100,000 inhabitants; the rural areas recorded a rate of 7 per 100,000 inhabitants; and cities outside metropolitan areas (Other Cities) reported a murder rate of 6 per 100,000 inhabitants.

Nature

To allow for a more detailed analysis of murder, the Uniform Crime Reporting Program collects supplemental information on this offense. Data are collected monthly on the age, sex, and race of murder victims and offenders; the types of weapons used in murders; the circumstances surrounding the offenses; and the relationships between victims and offenders.

As in recent years, murder victims were male in approximately 3 of every 4 instances in 1979. On the average, 54 of every 100 victims were White, 43 were Black, and the remainder were of other races.

During 1979, 16,955 offenders were identified in connection with the murders of 15,040 victims. Most of the victims (14,024) were slain in single victim situations. Of these, 12,429 were killed by single offenders and the remainder by more than one offender. Concerning homicides involving multiple victims, 815 persons were killed by 357 offenders in incidents involving one assailant and multiple victims, and 201 victims were slain by 207 offenders in multiple victim/multiple offender situations.

In 1979, firearms predominated as the weapons most often used in the commission of murders throughout the Nation. The accompanying chart illustrates the breakdown of murder offenses in the United States by type of weapon used. In both the North Central and Southern Regions, firearms were used in 65 percent of the murders; in the Western States, they were employed in 58 percent; and in the Northeastern States, they were used in 53 percent. Nationwide, 63 percent of the murders were committed through the use of firearms. Handguns were the weapons used in 50 percent of all murders.

A comparative study for the past 5 years showed a decrease in the use of firearms to commit murder. In 1975, firearms were used in 66 percent of all murders, while 63 percent of all murders in 1979 were perpetrated with these weapons. An analysis of weapons used to commit murder for 1975 through 1979 is shown in tabular form.

Total	100.0	63.3	19.2	11.9	5.6

[1]Because of rounding, percentages may not add to total.

Of weapons other than firearms employed in murder offenses reported in 1979, cutting or stabbing instruments were used in 19 percent. The most widespread use of such weapons occurred in the Northeastern States, where 25 percent of the murders were committed with a knife or cutting instrument. In the Western States these types of weapons were employed in 22 percent of the murders, while the Southern and North Central States had the least incidence of use of such weapons, 19 and 16 percent, respectively. Nationwide, other weapons such as blunt objects, poisons, explosives, etc., were used in 12 percent of the murders. In the remaining 6 percent, personal weapons, such as hands, fists, and feet, were used.

Murder, Type of Weapon Used, 1975–1979

[Percent distribution]

Year	Total		Firearms	Knife or other cutting instruments	Unknown or other dangerous weapons	Personal weapons
	Number	Percent[1]				
1975	18,327	100.0	65.8	17.7	7.5	9.0
1976	16,605	100.0	63.8	17.8	12.2	6.2

1978	18,714	100.0	63.6	18.8	11.8	5.7
1979	20,591	100.0	63.3	19.2	11.9	5.6

[1]Because of rounding, percentages may not add to total.

That murder is largely a societal problem beyond the control of the law enforcement community is emphasized by the relationship of the murder victim to the offender. Fifty-two percent of the murder victims in 1979 were acquainted with their assailants, and 1 of every 5 victims was related to the offender.

The greatest percentage of murders in 1979 (43 percent) resulted from arguments. Seventeen percent occurred as a result of felonious activity, and 5 percent were suspected to be the result of some felonious act.

[2]Murders committed during arguments while under influence of narcotics are not counted in felony murders.

Clearances

The clearance rate for murder in 1979 was higher than for any other Crime Index offense. City and suburban law enforcement agencies were successful in clearing 73 percent of the murders during the year, while those in rural areas cleared 83 percent. In 1979, persons under 18 years of age accounted for 5 percent of the willful killings cleared by law enforcement in cities and rural areas; 7 percent of those cleared in suburban areas involved only persons in that age group.

Persons Arrested

Arrests of youthful offenders under 18 years of age for murder decreased 12 percent during the period 1975–1979, and adult arrests for that offense fell 9 percent in the same period. In 1979, 44 percent of all persons arrested for murder were under age 25, and 9 percent were under 18. The 18- to 22-year age group, accounting for 25 percent of the total 1979 murder arrests, showed the heaviest involvement in this offense. Whites made up 49 percent of the total arrestees for murder in 1979, Blacks comprised 48 percent, and the remaining 3 percent were of other races.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are not included in this category.

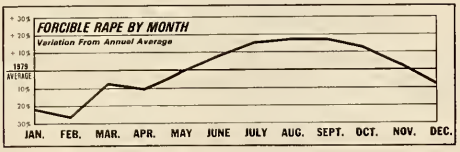
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*67,131*	*30.8*
1979	*75,989*	*34.5*
Percent change	+13.2	+12.0

Volume

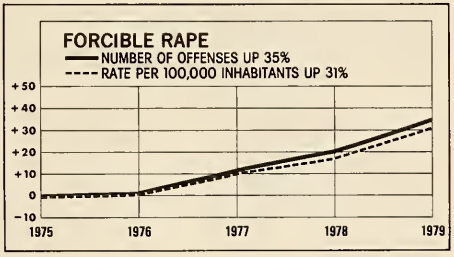
During 1979, there was an estimated total of 75,989 forcible rapes. Forcible rape continued, as in prior years, to comprise less than 1 percent of the Crime Index total and accounted for 6 percent of the volume of violent crimes. Geographically, the Southern States, the region with the largest population, recorded 34 percent of the forcible rape volume; the Western States, 27 percent; the North Central States, 23 percent; and the Northeastern States, the remainder.

The accompanying chart indicates that more rapes occur in the summer months than at any other time of the year.



Trend

The number of forcible rape offenses in 1979 was up 13 percent over 1978 and 35 percent over 1975. During 1979, 39 percent of the forcible rapes occurred in cities with 250,000 or more inhabitants, where an 11-percent increase in volume was recorded. In the suburban areas, forcible rape offenses rose 12 percent, and the rural areas registered a 4-percent increase over 1978. All regions indicated upsurges in the volume of forcible rape offenses with increases of 16 percent in the North Central States; 14 percent in the Southern States; 12 percent in the Northeastern States; and 11 percent in the Western States.



Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1979, an estimated 67 out of every 100,000 females in the country were reported rape victims, a 12-percent rate increase over 1978. Since 1975, the forcible rape rate has risen 31 percent.

The SMSAs experienced a rate of 80 victims per 100,000 females. Cities outside metropolitan areas (Other Cities) indicated a rate of 36 per 100,000 females, and the rural areas followed with 30 per 100,000 females. Geographically, the Western States reported females as rape victims at the rate of 96 per 100,000. In the Southern States, this female forcible rape rate was 71; in the North Central States, 57; and in the Northeastern States, 50.

Nature

Of all reported offenses in this category during 1979, 76 percent were rapes by force. Attempts or assaults to commit forcible rape comprised the remainder. Forcible rape, a violent crime against the person, has been recognized by law enforcement as one of the most underreported of all Index crimes, primarily because of victims' fear of their assailants and their embarrassment over the incidents.

Clearances

Both the cities and the suburban areas reported 48 percent of known forcible rapes were cleared by arrest or exceptional means in 1979. The rural areas recorded a 65-percent clearance rate. Of the total clearances for forcible rape, suburban areas had 11 percent involving only persons under the age of 18, while the cities and rural areas each reported 9 percent involving that age group alone.

Persons Arrested

Total 1979 arrests for forcible rape increased 9 percent from 1978 figures and 14 percent from those for 1975. Arrests of persons under 18 years of age for this offense increased 5 percent from 1975, while adult arrests climbed 16 percent for the same time period.

Fifty-seven percent of the forcible rape arrests in 1979 were of males under the age of 25, with 30 percent of the arrestees in the 18- to 22-year age group. Fifty percent of the persons arrested for forcible rape in 1979 were White, 48 percent Black, and all other races comprised the remainder.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

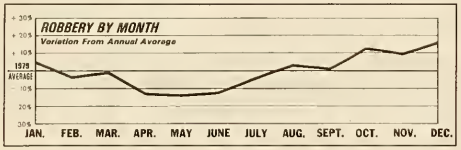
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*417,038*	*191.3*
1979	*466,881*	*212.1*
Percent change	+12.0	+10.9

Volume

In 1979, the estimated robbery total for the United States was 466,881, amounting to 4 percent of the total Crime Index and 40 percent of the crimes of violence. During the year, robberies occurred most frequently during the month of December.

The Northeastern States experienced the highest proportion of robberies, 32 percent of the total. The Southern States followed with 27 percent; the Western States reported 22 percent; and the North Central States accounted for the remainder.



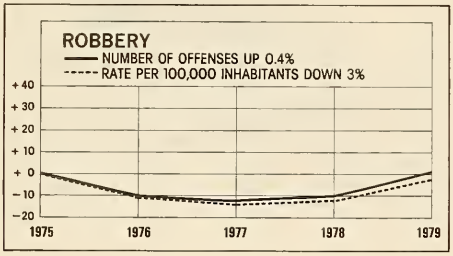
Trend

The 1979 robbery volume increased 12 percent from the previous year but rose less than 1 percent from the 1975 experience.

Both cities over 250,000 in population and the suburban areas reported 12-percent rises in robbery offenses in 1979 when compared with their 1978 volumes. An increase was also recorded by the rural areas, 6 percent.

Geographically, all four regions experienced an upsurge in robbery from 1978 to 1979. In the Southern States the increase was 17 percent; in the Northeastern States, 14 percent; in the Western States, 10 percent; and in the North Central States, 4 percent.

The accompanying chart depicts the trend in the volume of robbery, as well as the robbery rate, for the years 1975–1979.



Rate

The 1979 rate of 212 robberies per 100,000 inhabitants was 11 percent above the 1978 rate. Robbery is primarily a large-city crime with 7 out of 10 occurring in those cities with populations of 100,000 or more. The robbery rate for these cities was 561 per 100,000 people in 1979.

There were 276 robberies per 100,000 inhabitants in the SMSAs during 1979. The cities outside metropolitan areas (Other Cities) experienced a rate of 58 robbery offenses per 100,000 population, and in the rural areas, the robbery rate was 22 per 100,000 inhabitants.

Regionally, robbery occurred most frequently in the Northeastern States where the rate was 304 per 100,000 inhabitants. The rate per 100,000 inhabitants for the Western States was 245; for the Southern States, 174; and for the North Central States, 159.

Nature

During 1979, the average value loss per robbery was $532, for a total reported loss of $248 million. The impact of this violent crime on the victim cannot be measured in terms of monetary loss alone. While the object of a robbery is money or property, many victims of this crime suffer serious personal injury.

Nationally, nearly half of the reported robberies committed in 1979 were perpetrated on the streets or highways; the average loss for this type of robbery was $355. Among the various categories, bank robbery, which comprised less than 2 percent of all robberies, registered the highest average loss, $3,613 per incident.

Bank robberies climbed 51 percent from 1975–1979; increases were also reported for two other types of robberies—convenience store holdups rose 15 percent and street robberies were up 5 percent. In the same 5-year period, gas or service station holdups fell 17 percent, robberies of commercial or business establishments other than those listed above declined 8 percent, and residential robberies dropped 7 percent.

In 1979, 40 percent of all reported robberies were committed through the use of firearms; 38 percent by strong-arm tactics (hands, fists, feet, etc.); 13 percent by the use of knives or cutting instruments; and 9 percent through the use of other weapons.

[1]Because of rounding, percentages may not add to totals.

Clearances

Rural law enforcement agencies were successful in clearing 43 percent of the robbery offenses reported for 1979, while the suburban areas cleared 28 percent and the cities 25 percent. Of the robbery clearances reported, 20 percent in the suburban areas, 16 percent in the cities, and 12 percent in the rural areas involved only persons under 18 years of age.

Persons Arrested

Nationally, arrests for robbery rose 3 percent in 1979 when compared to 1978. Increases in the volume of arrests for these offenses were experienced in the suburban areas with a 7-percent upswing; in the rural areas with a 4-percent rise; and in the cities with a 2-percent upturn.

Data on arrests disclosed that 74 percent of the persons arrested for robbery were under 25 years of age, 55 percent were under 21, and 31 percent were under 18 years of age.

An average of 7 out of every 100 persons arrested for robbery during 1979 were female. Arrests of women for this offense increased 6 percent when compared to 1978.

From the standpoint of race, 57 percent of those arrested were Black, 41 percent were White, and 2 percent were of other races.

AGGRAVATED ASSAULT

DEFINITION

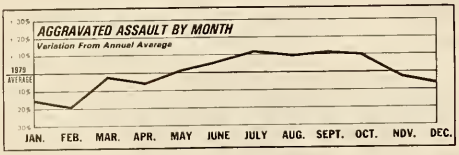
Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*558,102*	*255.9*
1979	*614,213*	*279.1*
Percent change	+10.1	+9.1

Volume

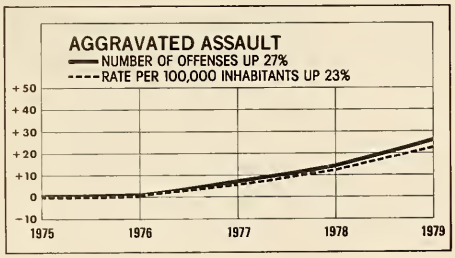
An estimated 614,213 aggravated assaults, comprising 5 percent of the total Crime Index and 52 percent of the crimes of violence, occurred in the Nation during 1979. Regionally, the Southern States, the most populous region, reported 36 percent of the total count of these crimes. The Western States followed with 24 percent, while the Northeastern States and North Central States each accounted for 20 percent. As has been the experience in previous years, the highest frequency of aggravated assaults was in the summer months of 1979.



Trend

In 1979, aggravated assaults increased 10 percent in volume as compared to 1978 and 27 percent over the 1975 experience. Cities with 250,000 or more population recorded a 9-percent upswing over the previous year, and the rural and suburban areas each reported 8-percent increases for the same period.

Rises were reported in the volume of aggravated assaults for each geographic region during the year. The increases were 13 percent in the Western States, 11 percent in the North Central States, 9 percent in the Southern States, and 8 percent in the Northeastern States.



Rate

During 1979 an average of 279 victims of aggravated assault were reported per 100,000 United States' inhabitants. In SMSAs, the aggravated assault rate was 312 per 100,000 inhabitants; in cities outside metropolitan areas (Other Cities), it was 248 per 100,000 inhabitants; and in rural areas, it was 143 per 100,000 inhabitants. Nationwide, the rate for aggravated assault increased 9 percent over 1978 and 23 percent over 1975.

Of the four geographic regions, the Western States had the highest rate, 356 per 100,000, and the Southern States followed with 306. The Northeastern States' aggravated assault rate was 252, and in the North Central States, it was 214.

Nature

In 1979, 23 percent of the aggravated assaults were committed through the use of firearms; knives or other cutting instruments were used in 22 percent; 28 percent were committed with blunt objects or other dangerous weapons; and the remaining 27 percent were committed with personal weapons such as hands, fists, and feet. A comparison of aggravated assault from 1975 to 1979 revealed that the use of firearms as weapons increased 8 percent; assaults with knives or other cutting instruments rose 11 percent; assaults where blunt objects or other dangerous weapons were used increased 28 percent; and those aggravated assaults committed through the use of personal weapons climbed 18 percent. The accompanying table exhibits the regional experience of aggravated assault in 1979 by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1979

[Percent distribution]

Region	Total[1] all weapons	Firearms	Knife or other cutting instruments	Other weapons; club, poison, etc.	Personal weapons
Northeastern States	100.0	14.9	24.5	30.1	30.5
North Central States	100.0	23.8	21.3	28.7	26.1
Southern States	100.0	27.3	24.1	25.4	23.2
Western States	100.0	23.1	19.1	27.8	30.0
Total	100.0	23.0	22.5	27.6	26.9

[1]Because of rounding, percentages may not add to totals.

Clearances

Collectively, city law enforcement agencies cleared an average of 59 per 100 cases of aggravated assault in 1979. This relatively high clearance rate was consistent with high rates for other crimes against the person. Persons under 18 years of age, exclusively, were identified in 11 percent of the city clearances.

Suburban and rural agencies reported 58 and 70 percent aggravated assault clearance rates, respectively. Persons under age 18 accounted for 13 percent of the suburban clearances and 6 percent of those in the rural areas.

Persons Arrested

Arrests for aggravated assault, during the period 1975–1979, were up 9 percent. Since 1975, arrests of persons 18 years of age and over for aggravated assault have risen 11 percent, and arrests of persons under age 18 increased less than 1 percent.

As a group, persons 21 years of age and over accounted for 69 percent of the 1979 aggravated assault arrests. Arrests of males for this offense outnumbered those of females by 7 to 1.

Whites made up 61 percent of the arrests for aggravated assault; Blacks comprised 37 percent; and all other races accounted for the remainder.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

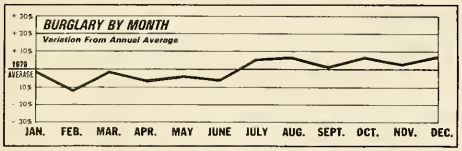
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*3,104,496*	*1,423.7*
1979	*3,299,484*	*1,499.1*
Percent change	+6.3	+5.3

Volume

In 1979, there were an estimated 3,299,484 offenses of burglary in the United States. For the year, large cities with 250,000 or more inhabitants accounted for 30 percent of the total burglary figure.

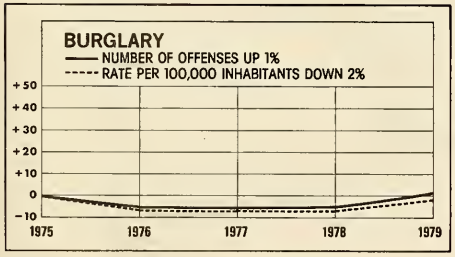
Burglary made up 27 percent of the total Crime Index offenses and was found to comprise 30 percent of the property crime. Geographically, the Southern States, the most populous region, experienced 32 percent of all reported burglaries; the Western States, 24 percent; and the Northeastern and North Central States, 22 percent each.

Viewed monthly, the highest volume of burglaries was recorded in December of 1979.



Trend

The 5-year trend, 1975–1979, indicated burglary offenses rose 1 percent. Nationally in 1979, the burglary volume increased 6 percent over 1978. For the year, cities 250,000 and over in population reported an increase of 6 percent; the suburban areas, a 5-percent increase; and the rural areas, a 3-percent rise. An upswing was registered in all regions, with the Southern States up 10 percent; the Northeastern and North Central States both having 6-percent increases; and the Western States showing a 2-percent upturn.



Rate

The 1,499 burglaries per 100,000 inhabitants reported during 1979 represented a 5-percent increase over the 1978 rate, but a 2-percent decrease from the 1975 experience. For 1979, the SMSAs reported a rate of 1,709 burglaries per 100,000 people, cities outside metropolitan areas (Other Cities) had a rate of 1,134 for every 100,000 in population, and the rural areas recorded a lower rate of 771 per 100,000 inhabitants.

Although the Western States recorded the highest 1979 burglary rate with 1,949 offenses per 100,000 inhabitants, their rate showed virtually no change from 1978. Each of the remaining regions showed rate increases from 1978. The Southern States' rate of 1,486 was up 8 percent; the Northeastern States followed with 1,473, up 7 percent; and the North Central States' rate of 1,220 represented a 5-percent rise.

Seventy-three percent of the burglaries in 1979 involved forcible entry, 20 percent were unlawful entries (without force), and the remainder were forcible entry attempts.

Residential offenses accounted for 64 percent of the total burglaries in 1979; nonresidential burglaries made up the remaining 36 percent. Daytime occurrences increased 6 percent for residential property and 12 percent for the nonresidential category in 1979 from 1978. Nighttime burglaries also rose—8 percent for nonresidential structures and 3 percent for the residential category.

During the period 1975–1979, daytime burglaries rose in volume, while nighttime incidents declined. Residential burglaries were up 7 percent during the day, but decreased 10 percent for the nighttime. Nonresidential daytime occurrences increased 21 percent, while nighttime occurrences fell 9 percent.

Burglary represents a substantial financial loss. In 1979, burglary victims suffered losses totaling $2.1 billion. The average dollar loss per burglary was $644.

Clearances

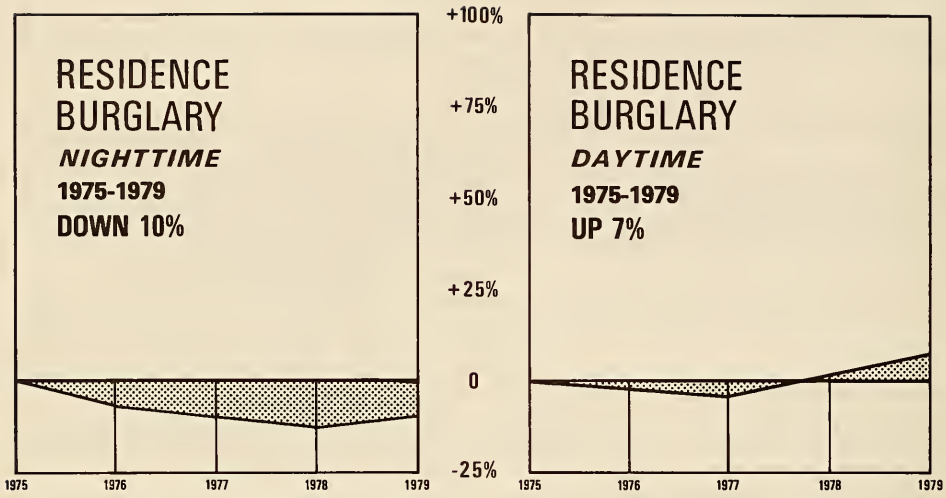
In 1979, adults were involved in 68 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 32 percent. Thirty-six percent of the burglary clearances in the suburban areas and 29 percent of those in the rural areas involved solely persons under age 18.

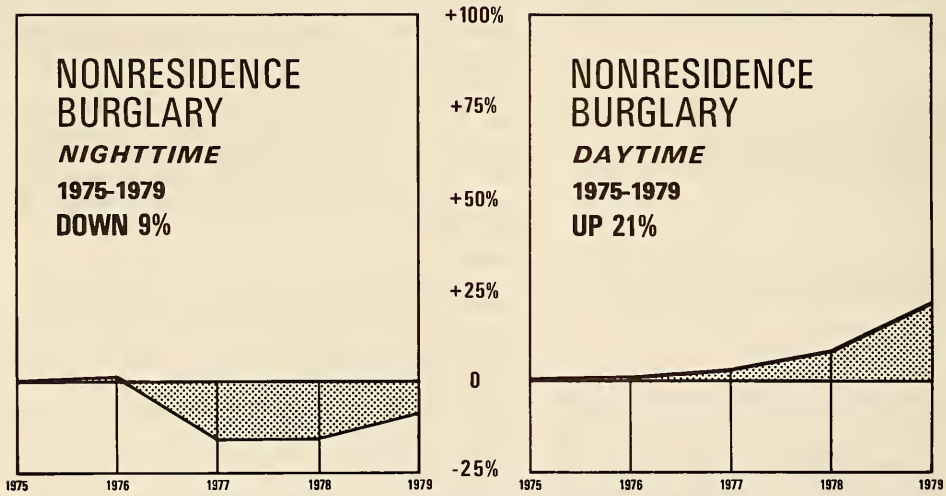
Of the burglaries reported within their jurisdictions in 1979, law enforcement agencies in rural areas cleared 19 percent; those in the suburban areas recorded a clearance rate of 15 percent; and agencies in cities with 250,000 or more inhabitants obtained clearances in 13 percent of these crimes.

Persons Arrested

In the UCR Program, the arrests of several persons may account for the clearance of but one crime. Likewise, with the arrest of one individual, law enforcement agencies may clear numerous offenses, which is often true in cases of burglary. In analyzing the 1975–1979 period, an 11-percent decline in burglary arrests was seen. Arrests of individuals under the age of 18 dropped 16 percent, and arrests of adult burglary offenders fell 5 percent.

When the 1978–1979 burglary figures were compared, an increase of 6 percent was seen for total burglary arrests of persons 18 years of age and over, while a decrease of 6 percent was seen for persons under the age of 18. Arrests for burglary were up 1 percent in both the suburban and





BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

rural areas, while they decreased less than 1 percent in the Nation's cities.

Nationally in 1979, persons under 25 years of age accounted for 83 percent of all arrests for burglary, and 49 percent of all arrested for this crime were under the age of 18. An average of 6 of each 100 persons arrested for this crime during 1979 were female. Of the total burglary arrests, Whites accounted for 69 percent, Blacks for 29 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

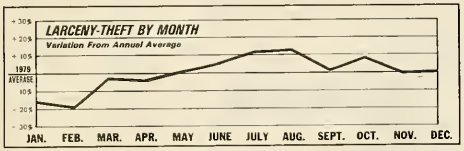
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*5,983,401*	*2,743.9*
1979	*6,577,518*	*2,988.4*
Percent change	+9.9	+8.9

Volume

An estimated 6,577,518 offenses of larceny–theft occurred in 1979. This high-volume offense made up 54 percent of the Crime Index total and 60 percent of the property crimes. As in 1978, the volume of larceny–theft was highest during the month of August.

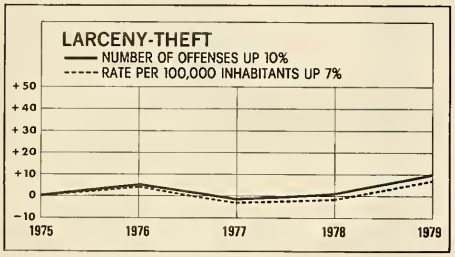
Geographically, the Southern States, which are the most populous, reported the highest number of larceny–thefts, 31 percent of the total. The North Central States followed with 26 percent, the Western States recorded 24 percent, and the Northeastern States accounted for the remainder.



Trend

The volume of larceny–thefts in 1979 rose 10 percent from 1978. The rural areas showed an increase of 13 percent; in the suburban areas, a 10 percent upturn was registered; and cities with populations of 250,000 or more reported an upswing of 7 percent.

The larceny–theft trend showed little variation among the regions. The Northeastern States reported an 11-percent increase; the Southern and Western States experienced upswings of 10 percent; and the North Central States showed a rise of 9 percent in the volume of larceny–thefts.



Rate

During 1979, there were 2,988 larceny–thefts per 100,000 United States' inhabitants, an increase of 9 percent from the 1978 rate and 7 percent from 1975.

In SMSAs, the 1979 larceny–theft rate was 3,353 per 100,000 inhabitants; 3,218 per 100,000 inhabitants in cities outside metropolitan areas (Other Cities); and 1,072 in the rural areas.

The Western States reported the highest 1979 larceny–theft rate with 3,823 offenses per 100,000 inhabitants, an 8-percent increase over 1978. The North Central States had a rate of 2,926, a rise of 9 percent; the Southern States' rate of 2,808 was up 8 percent; and the Northeastern States, with a rate of 2,626, reported an increase of 11 percent.

Nature

For each reported larceny–theft in 1979 the average value of property stolen was $256, up from $219 in 1978. When the average value was applied to the estimated number of larceny–thefts, the loss to victims nationally was $1.7 billion. While a portion of the goods stolen is recovered, the relatively low clearance percentage for larceny–thefts (19 percent) and the frequent absence of owner identification on recovered property indicate the overall loss due to this criminal activity is not substantially reduced. In addition, other studies have indicated many offenses in this category, particularly if the value of the stolen goods is small, never come to police attention.

In 1979, the average value of goods and property reported stolen as a result of pocket-picking was $190; by purse-snatching, $129; and by shoplifting, $59. Miscellaneous thefts from buildings and thefts from motor vehicles averaged $391 and $299, respectively, and thefts of motor vehicle accessories resulted in average losses of $109 per offense.

As in prior years, a large portion of these offenses, 37 percent, was comprised of thefts of motor vehicle parts, accessories, and contents. Other major types of thefts which contributed to the large number of these crimes were those from buildings, 16 percent, and stolen bicycles and shoplifting, 11 percent each. The remainder was distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and miscellaneous types of larceny–thefts. The accompanying table presents the distribution of larceny–theft by type and geographic region.

Larceny Analysis by Region, 1979

[Percent distribution]

clearance rates. One of every 3 of these crimes cleared in the Nation's cities and suburban areas involved persons under 18 years of age exclusively. In the rural areas, larceny–theft clearances for this age group represented 20 percent of the total.

Persons Arrested

During the period 1975–1979, the total volume of larceny–theft arrests rose less than 1 percent. Adult arrests were up 8 percent for this 5-year period, while those of persons under 18 years of age decreased 9 percent. Total arrests for this offense increased 4 percent, 1979 over 1978.

The larceny–theft category not only comprised the largest portion of the total Crime Index offenses reported, it also accounted for 51 percent of the total arrests for Index crimes in 1979. Fifty-eight percent of these arrests were of persons under 18 years of age, and 58 percent of the arrestees were under 21. Arrests of males for larceny–theft violations increased 6 percent in 1979, and those of females decreased 1 percent. Females comprised 30 percent of all larceny–theft arrestees and were arrested for this offense more often than for any other in 1979. Whites accounted for 67 percent of the total larceny–theft arrests and Blacks for 30 percent. All other races made up the remaining 3 percent.

MOTOR VEHICLE THEFT

DEFINITION

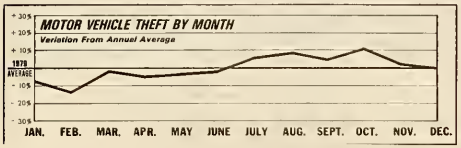
In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1978	*991,611*	*454.7*
1979	*1,097,189*	*498.5*
Percent change	+10.6	+9.6

Volume

Totaling an estimated 1,097,189 offenses in 1979, motor vehicle thefts accounted for 9 percent of all Index crimes. While more of these offenses—29 percent—occurred in the Northeastern States, the Southern States followed closely with 25 percent, and both the North Central and Western States reported 23 percent. The volume of thefts of motor vehicles was highest during the month of October.

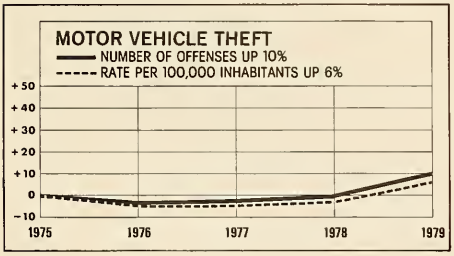


Trend

The number of motor vehicle thefts in 1979 jumped 11 percent over the 1978 experience.

During the 1978–1979 period, the increases in motor vehicle thefts ranged from 15 percent in cities with populations from 10,000 to 24,999 to 6 percent in cities with 100,000 to 249,999 inhabitants. Cities 250,000 and over in population and the suburban and rural areas all reported increases of 11 percent in the volume of these offenses.

Geographically, motor vehicle thefts were up in all regions. The greatest increase occurred in the most populous region, the Southern States, which showed a 16-percent upturn. The North Central States recorded a 10-percent rise, and the Northeastern and Western States each reported 9-percent increases. The accompanying chart illustrates that the volume of motor vehicle thefts has risen 10 percent since 1975.



Rate

The motor vehicle theft rate of 498 offenses per 100,000 inhabitants in 1979 was up 10 percent from 1978 and 6 percent over the 1975 experience. In 1979, 1,244 thefts per 100,000 inhabitants occurred in cities with populations over one million.

Nationally, the motor vehicle theft rate in the SMSAs was 611 per 100,000 inhabitants. Cities outside metropolitan areas (Other Cities) had a motor vehicle theft rate of 266, and the rural areas recorded the lowest rate, 137. The continuing high motor vehicle theft rates in the most heavily populated municipalities of the Nation clearly indicate this crime is primarily a large-city problem.

Of the Nation's regions, the Northeastern States reported the highest motor vehicle theft rate, 660 per 100,000 inhabitants, a 9-percent increase from 1978. The remaining regions' rates per 100,000 population were 606 in the Western States, up 6 percent; 433 in the North Central States, a rise of 9 percent; and 379 in the Southern States, a 14-percent jump.

In 1979, an estimated average of 1 of every 145 registered motor vehicles was stolen nationally. Geographically, this rate was greatest in the Northeastern Region where 11 of every 1,000 motor vehicles registered were stolen. The other three regions reported lesser rates—8 per 1,000 in the Western States, 6 in the North Central States, and 5 in the Southern States.

Nature

During 1979, the average value of motor vehicles stolen was $2,692 at the time of theft. Of all motor vehicles reported stolen during the year, 75 percent were automobiles, 13 percent were trucks or buses, and 12 percent were other types.

Motor Vehicle Theft, 1979

[Percent distribution]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Northeastern States	100.0	88.1	6.1	5.8
North Central States ...	100.0	72.1	13.8	14.0
Southern States	100.0	67.2	18.5	14.3
Western States	100.0	69.1	14.9	15.9
Total	100.0	75.1	12.9	12.0

[1]Because of rounding, percentages may not add to totals.

Clearances

Law enforcement agencies in cities cleared 14 percent of the motor vehicle thefts reported in their locales during 1979; those in the suburban areas cleared 18 percent; and rural agencies cleared 34 percent. By geographic location, clearance percentages for motor vehicle theft ranged from 23 percent in the South Atlantic Division to 9 percent in both the New England and Middle Atlantic Divisions.

A high proportion of the clearances in all geographic divisions and population groups involved only persons under 18 years of age. In the suburban areas, persons in this age group accounted for 29 percent of the motor vehicle thefts cleared; in the Nation's cities, they accounted for 28 percent; and in the rural areas, 25 percent.

Persons Arrested

As in prior years, motor vehicle theft arrests primarily involved the younger segment of the Nation's population. During 1979, 69 percent of all persons arrested for motor

vehicle theft were under 21 years of age, and those under 18 accounted for 49 percent of the total.

When the total volume of arrests for this offense during 1979 was compared with that of the previous year, a decrease of 1 percent was observed. Arrests of persons under 18 were down 5 percent, but adult arrests rose 3 percent over 1978. During the period 1975–1979, motor vehicle theft arrests increased 2 percent.

Whites made up 70 percent of the arrestees for motor vehicle theft, Blacks 27 percent, and all other races accounted for the remainder.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Background

Arson was designated a Uniform Crime Reporting Part I, Crime Index offense by congressional mandate in October, 1978. The FBI staff responsible for the UCR Program immediately began developing a data collection strategy that would eventually allow for an accurate portrayal of the arson problem. The strategy was also designed to protect the integrity of historical UCR data.

Since the entire concept of the Crime Index is based on actual offenses known to law enforcement, it was determined that only data on fires established through investigation to have been willfully or maliciously set, including attempts, were to be solicited. Unknown origin or suspicious fires were to be excluded from the offense counts until authorities definitely determined them to be arsons, and therefore, crimes.

It was also recognized at the outset in planning the data collection that arson offenses frequently occurred in conjunction with other Index crimes, e.g., burglary. However, according to UCR procedures in such multiple offense situations, only one crime selected on the basis of an established hierarchy was to be reported. For example, if a burglary and arson occurred at the same time and place, only the burglary would be reported if the crimes were subjected to the hierarchy rule of reporting Index offenses. This assumes, of course, that arson would be listed subordinate to burglary in the hierarchy. To overcome this obstacle, arson was excluded from this hierarchical procedure, and the requirement was established that all arsons, regardless of their occurrence in conjunction with another crime against property or crime against a person, were to be reported.

In order to design a data collection form that would provide detailed and meaningful information regarding arson, the UCR Program's staff established liaison with members of the law enforcement, fire service, and insurance communities. Each of these three entities furnished the national UCR Program with invaluable background information, suggestions on the types of arson-related data to be collected, and many more recommendations. Utilizing the input from these sources, a form was developed, and in April, 1979, it was approved by the Office of Management and Budget, printed, and distributed to UCR contributors.

Initial indications show a positive spirit of cooperation among agencies and individuals interested in the collection, analysis, and publication of arson data. Each of the 50 states responded in some degree to the data solicitation, and while not all participating agencies were able to furnish figures for the first months of 1979, many provided partial information.

Volume

While not all UCR participating agencies were able to respond to the arson data collection request, 8,528 agencies (representing 61 percent of the United States population) submitted 6 or more monthly arson reports. On the submissions, a total of 77,147 arson offenses were reported during 1979. Of the 8,528 agencies submitting arson counts, 8,344 provided complete reports with detailed information, including type of structure and extent of damage.

Nature

Structures were by far the most frequent targets of arsons in 1979, comprising 57 percent of the total reported incidents. Mobile (motor vehicles, trailers, airplanes, boats, etc.) and other property (crops, timber, fences, signs, etc.) accounted for the remaining offenses with 24 and 19 percent, respectively.

Residences comprised more than half of the structures at which arsons were directed. Seventeen percent of all targeted structural property was uninhabited or abandoned at the time the arson occurred.

The total monetary value of property damaged due to reported arsons during 1979 exceeded one-half billion dollars, and the average loss per incident was $7,465. Industrial/manufacturing structures registered the highest average loss, $49,769 per offense.

[1]Includes offenses cleared by exceptional means.

Clearances

Seventeen percent of all reported arsons were cleared by arrest or exceptional means with the highest clearance rate (32 percent) being recorded for offenses in which community or public structures were involved. Only persons under 18 years of age accounted for 46 percent of the reported arson clearances.

Persons Arrested

While the number of arson offenses reported to law enforcement was first collected by the national UCR Program in 1979, the number of arrests for this crime has been reported for many years. During 1979, an estimated 19,800 arson arrests were reported by law enforcement agencies. The volume of arrests rose 5 percent in 1979 over the 1978 figures and 8 percent over those in 1975.

Forty-nine percent of all persons arrested for arson in 1979 were under 18 years of age, and 73 percent were under 25. Seventy-nine percent of the arrestees were White, 19 percent were Black, and the remainder were of other races. Males comprised 89 percent of all persons arrested for this offense.

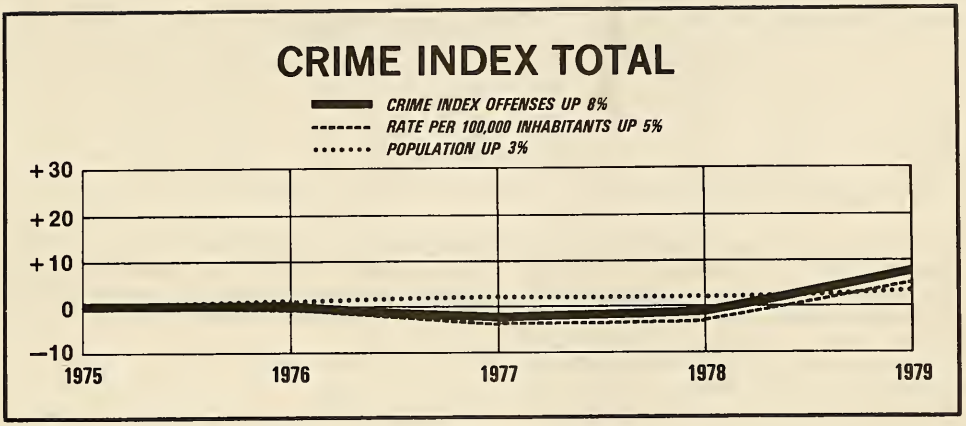
[1]Includes offenses cleared by exceptional means.



Crime Index Total

An estimated 12,152,730 Crime Index offenses, 9 percent more than during 1978, were reported to law enforcement agencies in 1979. Collectively, violent crimes, which comprised 10 percent of the total Crime Index, were up 11 percent and property crimes rose 9 percent.

All offenses within the Index increased in volume during the year. Among the violent crimes, murder was up 10 percent; forcible rape, 13 percent; robbery, 12 percent; and aggravated assault, 10 percent. In the property crime category, burglary increased 6 percent, larceny-theft rose 10 percent, and motor vehicle theft was up 11 percent.

Since 1975, the total volume of Crime Index offenses increased 8 percent. A rise of 15 percent was seen in the violent crime category, and an upswing of 7 percent was reported for property crime during this 5-year period.

The estimated 1979 crime figures are set forth in the table entitled "National Crime, Rate, and Percent Change."

National Crime, Rate, and Percent Change

Offense	Estimated crime 1979		Percent change over 1978		Percent change over 1975		Percent change over 1970	
	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants	Number	Rate per 100,000 inhabitants

[1]Because of rounding, percentages may not add to totals.

Provided in the table, "Regional Offense and Population Distribution, 1979," are data showing the estimated geographical distribution of Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1979, they also represented the greatest regional population.

Based on the Crime Index offenses, crime rates relate the incidence of reported crime to population. However, many factors, some of which are shown on page v of this publication, influence the nature and extent of crime in a particular community. A crime rate takes into consideration only the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area.

The table, "Crime Rate, Region, 1979," lists the crime rates for the four geographic regions of the United States.

Crime Rate, Region, 1979

[Rate per 100,000 inhabitants]

Offense	Northeastern States	North Central States	Southern States	Western States
Crime Index total	5,348.5	4,988.4	5,202.6	7,038.9
Modified Crime Index total

Larceny-theft	2,625.6	2,925.9	2,808.3	3,822.7
Motor vehicle theft	660.2	433.3	379.1	606.1
Arson				

The table, "Crime Rate, Area, 1979," presents the crime experience in SMSAs, rural areas, and cities and towns outside metropolitan areas (Other Cities), illustrating the higher crime rates in the metropolitan areas.

Note

The collection of statistics on arson, a newly established Crime Index offense, was begun in 1979. However, complete annual figures are not available for inclusion in tables presenting figures for the total United States. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9.

Crime Rate, Area, 1979

Crime Index Tabulations

In the accompanying tables, data on crime in the United States as a whole; geographic divisions; individual states; Standard Metropolitan Statistical Areas; and cities, towns, and counties are presented. Although the total number of criminal acts occurring is unknown, offenses reported to law enforcement agencies represent an indicator of criminal activity.

In reviewing the tables in this report, it must be remembered that many factors can cause the volume and type of crime to vary from place to place. Population, one of these factors, is used in computing crime rates; however, all communities are affected to some degree by seasonal or transient populations. Since estimates of current permanent population are used to construct crime rates, short term population variability is not accounted for in these rates.

In addition to the presentations outlined above, national averages for the value of property stolen in connection with each offense are presented in the tables. Further breakdowns by type for the robbery, burglary, and larceny-theft classifications are listed. Also, data on the

type and value of property stolen and recovered are provided.

National averages can serve as a valuable guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with such a comparison. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

[1]Populations are Bureau of Census provisional estimates as of July 1, except April 1, 1970, census.

[2]Due to rounding, the offenses may not add to totals.

[3]The collection of statistics on arson, a newly established Index offense, was begun in 1979. However, summary statistics are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies is displayed in tables 6 through 9 of this publication.

[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Crime rates calculated prior to rounding number of offenses.

Table 3.—Index of Crime: Region, Geographic Division, and State 1978–1979

[Number and rate per 100,000 inhabitants; percent change over 1978]

[1]Population for each state for 1978 and 1979 are Bureau of Census provisional estimates as of July 1st and are subject to change.

[2]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Offense totals based on all reporting agencies and estimates for unreported areas.

[5]Includes the District of Columbia.

Forcible rape		Robbery		Aggravated assault		Burglary		Larceny-theft		Motor vehicle theft		Arson[2]

[1]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data not included for the property crime of arson.

[1]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery and aggravated assault.

[3]Property crimes are offenses of burglary, larceny—theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]1979 figures not comparable with prior years and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses or annexation are removed from trend tables.

Table 6.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1979

*Numbers in parentheses indicate the number of months for which arson data were received. Arson figures are not shown if reports for less than 6 months were received. The Modified Crime Index total is the sum of all crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]1979 figures not comparable with prior years, and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses or annexation are removed from trend tables.

Table 7.—Number of Offenses Known to the Police, Universities and Colleges, 1979

*Numbers in parentheses indicate the number of months for which arson data were received. Arson figures are not shown if reports for less than 6 months were received. The modified property crime total is the sum of all property crime offenses, including arson.

University/College	Student enrollment[1]	Violent crime total	Violent Crime				Property crime total	Modified* Property crime total	Property Crime

[1] The student enrollment figures are adjusted by converting part-time students into full-time equivalents (FTEs). See Appendix I for a detailed explanation of the computation.
[2] Student enrollment not available.

Table 8.—Number of Offenses Known to the Police, Suburban Counties, 1979

*Numbers in parentheses indicate the number of months for which arson data were received. Arson figures are not shown if reports for less than 6 months were received. The Modified Crime Index total is the sum of all Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

Table 9.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1979

Numbers in parentheses indicate the number of months for which arson data were received. Arson figures are not shown if reports for less than 6 months were received. The Modified Crime Index total is the sum of all Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.
[5]Includes state police agencies with no county breakdown.

[1]Suburban places are within Standard Metropolitan Statistical Areas (SMSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Core cities are excluded. Nonsuburban places are outside SMSAs.

[2]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny–theft, and motor vehicle theft. Data are not included for the property crime of arson.

[1]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other groups.

Table 14.—Crime Rates, Offenses Known to the Police, Population Group, 1979

[1979 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified[1] Crime Index total	Violent[2] crime	Property[3] crime	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[3]

[1]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

SECTION III

CRIME INDEX OFFENSES CLEARED

A crime is cleared when a law enforcement agency has identified the offender, has sufficient evidence to charge him, and actually takes him into custody. In exceptional instances, crimes may be cleared when some element beyond police control precludes taking the offender into custody. Examples of circumstances resulting in exceptional clearances would be the death of an offender (suicide, deathbed confession, etc.) or the refusal of a victim to prosecute after an offender is identified. It should be noted that the arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

In 1979, law enforcement agencies reported that 20 percent of the Index crimes were cleared. Among the violent crimes, 73 percent of murder offenses, 48 percent of forcible rapes, 25 percent of robberies, and 59 percent of aggravated assaults were cleared by law enforcement agencies. In connection with property crimes, police cleared 15 percent of the burglaries, 19 percent of the larceny–thefts, and 14 percent of the motor vehicle thefts. Clearances for crimes against persons are generally higher than those for crimes against property because more intense investigation efforts are often afforded these offenses and because witnesses who can identify the perpetrators are frequently available.

Regionally, the highest overall Crime Index clearance rate was recorded by the Southern States with 22 percent. The Western and North Central States each reported 20–percent clearance rates, and the Northeastern States recorded 17 percent cleared.

Clearances Involving Only Persons under 18 Years of Age

Only persons under 18 years of age were the offenders in 27 percent of the Crime Index offenses cleared in 1979. Clearances involving only youths in the aforementioned age group were 12 percent for violent crimes and 31 percent for property crimes. During the same year, persons 10 to 17 years of age accounted for approximately 14 percent of the total United States population.

The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Table 22.—Offenses Known Breakdown and Percent Cleared by Arrest[1], Population Group, 1979

[1979 estimated population]

Population Group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[2]		
	Rape by force	Assault to rape–attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
TOTAL CITIES: 8,374 cities; total population 138,468,000:

[1]Includes offenses cleared by exceptional means.
[2]The collection of statistics on arson, a newly established Index offense, was begun during 1979. However, summary tabulations are not yet available for inclusion in this table. The number of arson offenses reported by individual law enforcement agencies are displayed in tables 6 through 9 of this publication.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

SECTION IV
PERSONS ARRESTED

Although primarily an indication of law enforcement activity, the number of arrests provides a limited profile of the perpetrators of crime, especially for those crimes which have high clearance rates. Differing arrest practices, policies, and enforcement emphases among agencies influence the volume of arrests for various offenses, particularly those against public order, such as drunkenness, vagrancy, disorderly conduct, and related violations. However, arrests for serious crimes, e.g., robbery or burglary, are more likely to be consistent and uniform throughout all jurisdictions. Procedures employed in this Program require that an arrest be counted on each separate occasion an individual is taken into custody, notified, or cited. Also, although several charges may be lodged against a person at the time of arrest, only one arrest is counted for each separate time he is taken into custody.

Law enforcement agencies in the United States effected an estimated 10.2 million arrests in 1979 for all criminal infractions other than traffic violations. Nationally, the arrest rate per 1,000 inhabitants was 46; for cities with populations 250,000 and over, the rate was 61; for suburban counties, 39; and for rural counties, 34.

Arrest Trends

Arrests by law enforcement for all crimes other than traffic violations increased 1 percent in 1979 from 1978. In this same period, arrests of persons under 18 years of age decreased 2 percent, while arrests of persons 18 years of age and over were up 2 percent. When only arrests for Crime Index offenses (murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny–theft, motor vehicle theft, and arson) were used to compute a trend for all ages, a 3-percent increase was evident for 1979 as compared to 1978.

During the 5 years from 1975 to 1979, arrests for all offenses except traffic increased 1 percent, with arrests of persons under 18 years of age down 11 percent. Arrests of persons 18 years of age and over, however, increased 6 percent. When restricted to the eight Crime Index offenses, total arrests declined 2 percent and those of persons under age 18 fell 11 percent. An increase of 5 percent in adult arrests occurred during the same 5-year period.

Arrests for drug abuse violations in 1979 decreased 7 percent nationwide from 1978. In the period 1975 to 1979, arrests for these violations were down 11 percent. The types of drugs involved in violations resulting in arrests during 1979 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations

[Percent distribution]

	Total[1]	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	16.4	72.3	3.7	7.6
Sale/manufacture	20.6	6.2	11.0	1.1	2.3
Possession	79.4	10.2	61.3	2.5	5.3
North Central States	100.0	9.4	73.4	3.2	14.1
Sale/manufacture	16.3	3.3	7.4	.9	4.8
Possession	83.7	6.1	66.0	2.3	9.3
Southern States	100.0	6.9	75.0	4.9	13.2
Sale/manufacture	20.3	2.4	10.2	1.7	6.1
Possession	79.7	4.6	64.8	3.2	7.1
Western States	100.0	18.3	59.3	.8	21.6
Sale/manufacture	14.3	4.0	6.8	.2	3.3
Possession	85.7	14.3	52.5	.6	18.3
Total	100.0	12.2	70.1	3.3	14.5
Sale/manufacture	18.1	3.7	8.9	1.0	4.4
Possession	81.9	8.5	61.1	2.2	10.1

[1]Because of rounding, percentages may not add to totals.

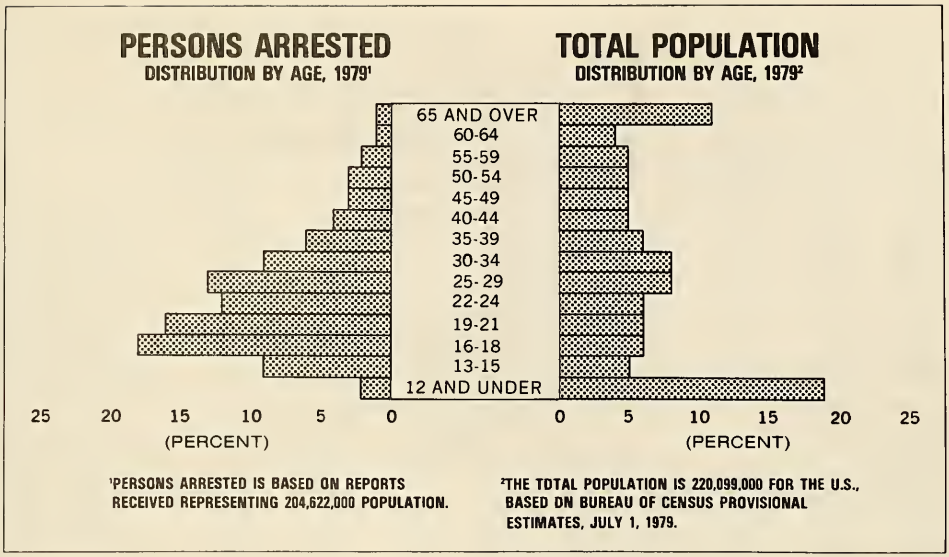
Age

In the Nation, 7 percent of all persons arrested were under the age of 15, 23 percent were under 18, 40 percent were under 21, and 57 percent under 25. In the suburban areas, the volume of arrests of persons in the young-age groups was greater than the national figures, with the under 15 age group representing 8 percent; under 18, 26 percent; under 21, 45 percent; and under 25, 61 percent. The distributions of arrests in the rural areas were lower for the younger age groups, with the under 15 group being involved in only 3 percent; under 18, in 13 percent; under 21, in 31 percent; and those under 25, in 49 percent.

Considering only the Crime Index offenses (including arson), the percent of all arrestees in the Nation during 1979 who were under the age of 15 was 14 percent; under the age of 18, 39 percent; under 21, 57 percent; and under 25, 72 percent.

Sex

Male arrests increased 1 percent in 1979 over 1978, while female arrests decreased 1 percent. Arrests of males outnumbered those of females by 5 to 1, nationally, with males accounting for 81 percent of the arrests for Index crimes and 90 percent of those for crimes of violence.



Female arrests for Index crimes were down less than 1 percent from 1978. As in previous years, their criminal involvement related mainly to larceny, which accounted for 79 percent of all female arrests for Index offenses.

From 1975 to 1979, arrests of males under 18 years of age decreased 10 percent; female arrests for the identical age group decreased 13 percent. Arrests for the eight Crime Index offenses during this 5-year period declined for both females and males under age 18, 10 and 11 percent, respectively.

Arrest Rates

Arrest rates are a measure of law enforcement activity in response to crime. The accompanying table presents, by geographic region, the Crime Index arrest rates per 100,000 inhabitants in the United States.

Arrests, Region, 1979

[Rate per 100,000 inhabitants]

Offense	United States total	North-eastern States	North Central States	Southern States	Western States
Murder	8.9	5.6	7.1	11.9	10.3
Forcible rape	14.3	12.8	11.9	15.2	17.8
Robbery	63.9	79.4	46.6	56.6	82.8
Aggravated assault	125.4	114.3	67.7	151.9	174.4
Burglary	228.8	221.0	163.2	237.9	315.8
Larceny-theft	536.8	447.4	499.5	537.9	697.5
Motor vehicle theft	70.2	60.6	52.2	58.1	129.2
Arson	9.0	9.9	8.1	7.9	11.2
Crime Index total[1]	1,057.2	951.1	856.3	1,077.3	1,438.8

[1]Includes arson, a newly established Index offense in 1979.

Table 24.—Total Estimated Arrests[1], United States, 1979

Property crime[3]	1,859,200		
Crime Index total[3]	2,326,900		
Other assaults	485,500	Offenses against family and children	57,400
Forgery and counterfeiting	76,400	Driving under the influence	1,324,800
Fraud	261,900	Liquor laws	416,200
Embezzlement	8,600	Drunkenness	1,172,700
Stolen property; buying, receiving, possessing	115,800	Disorderly conduct	765,500
Vandalism	257,300	Vagrancy	37,200
Weapons; carrying, possessing, etc.	164,200	All other offenses (except traffic)	1,716,600
Prostitution and commercialized vice	89,400	Suspicion (not included in total)	19,600
Sex offenses (except forcible rape and prostitution)	67,400	Curfew and loitering law violations	84,100
		Runaways	164,400

[1]Arrest totals based on all reporting agencies and estimates for unreported areas.
[2]Because of rounding, items may not add to totals.
[3]Includes arson, a newly established Index offense in 1979.

Table 25.—Arrest, Number and Rate, Population Group, 1979

Offense charged	Total (11,758 agencies; total population 204,622,000)	Total city arrests (8,555 cities; population 143,151,000)	Cities						Counties	
			Group I (55 cities 250,000 and over; population 40,944,000)	Group II (116 cities 100,000 to 249,999; population 16,522,000)	Group III (263 cities 50,000 to 99,999; population 18,115,000)	Group IV (640 cities 25,000 to 49,999; population 22,096,000)	Group V (1,547 cities 10,000 to 24,999; population 23,943,000)	Group VI (5,934 cities under 10,000; population 21,531,000)	Suburban counties[1] (833 agencies; population 33,114,000)	Rural counties (2,370 agencies; population 28,357,000)

[1]Includes only suburban county law enforcement agencies and is not comparable to suburban area totals found in other arrest tables.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[4]Includes arson, a newly established Index offense in 1979.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 26.—Total Arrest Trends, 1970–1979

[3,943 agencies; 1979 estimated population 114,952,000]

Offense charged	Number of persons arrested								
	Total all ages			Under 18 years of age			18 years of age and over

[1]Because of rounding, the percentages may not add to total.
[2]Less than one-tenth of 1 percent.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson, a newly established Index offense in 1979.

[1]Because of rounding, the percentages may not add to total.
[2]Less than one-tenth of 1 percent.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson, a newly established Index offense in 1979.

[2] Because of rounding, the percentages may not add to total.
[3] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities also included in other city groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

SECTION V
LAW ENFORCEMENT PERSONNEL

Law Enforcement Employees

A total of 437,000 full-time law enforcement officers for a national rate of 2.1 per 1,000 inhabitants was reported as of October 31, 1979, by 11,698 agencies representing more than 207 million United States inhabitants. Including full-time civilians, the total law enforcement employee count was 553,000 and the rate 2.7 per 1,000 inhabitants.

Because of wide variations in the responsibilities of law enforcement agencies across the Nation, caution should be used when attempting any comparison of employee rates. Just as many factors affect the extent and type of crime from place to place, the conditions present in any given community affect the type of police service required. For example, the need for law enforcement service in a community having a highly mobile or seasonal population differs from a locale whose population is relatively stable. Further, a small community situated between two large cities may, due to its geographic location, require a greater number of law enforcement personnel than a similarly sized community having no urban centers nearby.

The functions of sheriffs also differ significantly in various sections of the country. In certain areas, the sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, state police and highway patrol agencies may have vastly different responsibilities from jurisdiction to jurisdiction.

The law enforcement employee rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can only be determined after careful study and analysis of the various conditions which contribute to the requirements for law enforcement service in that jurisdiction.

Many United States cities operate with substantially fewer law enforcement employees than the national average. For example, the average for cities in the 10,000 to 49,999 population range was 2.0 law enforcement employees per 1,000 inhabitants. However, this low average rate for smaller cities is contrasted by the higher 3.4 average rate for cities with populations of 250,000 or more. The Nation's suburban areas averaged 2.3 full-time law enforcement employees per 1,000 inhabitants, while for sheriffs' or county police departments the average rate was 2.0.

Geographically, the South Atlantic and Middle Atlantic Divisions recorded the highest rates of law enforcement employees per 1,000 inhabitants, 3.1 and 2.8, respectively. The fewest employees per 1,000 population were reported by the West North Central and West South Central Divisions, each with an average rate of 2.2.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the average for all cities was 2.1 officers per 1,000 inhabitants. The lowest average rate was recorded in cities with populations between 25,000 and 49,999 with 1.6, while cities with 250,000 or more inhabitants registered the highest, 2.8. For sheriffs' or county police departments, the average rate was 1.5 per 1,000 population.

In city agencies, males represented 97 percent of all sworn personnel; in suburban agencies they accounted for 95 percent; and in sheriffs' and county police departments, 91 percent.

Civilian Employees

During 1979, 18 percent of all city law enforcement personnel were civilians. In suburban areas, civilians represented 20 percent of the total strength, and in sheriffs' and county police departments, they comprised 23 percent.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

An average rate of 17 of every 100 law enforcement officers nationwide were assaulted in 1979. During the year, 59,031 assaults were reported by 9,638 agencies covering approximately 83 percent of the total United States population.

Injuries to Law Enforcement Officers

Nationally, nearly 22,000 personal injuries, a rate of 6 per 100 officers, were reported as resulting from assaults on officers in 1979. Geographically, the injury rate ranged from 3 per 100 officers in the East South Central Division to 11 per 100 in the New England Division. Within population groups, law enforcement officers in cities with 100,000 to 249,999 inhabitants experienced the greatest rate of assaults with injuries, 9 per 100. Sheriffs' and county police departments had the lowest injury rate with 3 per 100 officers.

[1]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

Weapons Used in Assaults on Law Enforcement Officers

Personal weapons, such as hands, fists, feet, etc., were used in 82 percent of the assaults on officers in 1979. Firearms were used in 5 percent of the assaults, knives or cutting instruments in 3 percent, and other dangerous weapons in 9 percent. Tables 66 and 68 present data on the types of weapons used in assaults within geographic divisions and population groups and by the types of activities in which the officers were involved at the time the assaults occurred.

Of all officers assaulted with firearms, 21 percent sustained personal injuries. Thirty-four percent of the assaults with knives or other cutting instruments, 38 percent of those with personal weapons, and 41 percent of those with other weapons resulted in injuries to law enforcement officers during the year.

Time of Assault

Data concerning assaults on officers by time and population group are set forth in Table 69. Approximately one-half of the assaults on law enforcement officers occurred during the 6-hour period 8:00 p.m. to 2:00 a.m.

[1]Because of rounding, percentages may not add to total.

Activity of Law Enforcement Officers at the Time of Assault

The largest portion of assaults, 32 percent, occurred while officers were responding to disturbance calls (family quarrels, man-with-gun calls, bar fights, etc.). Three percent of the officers assaulted were responding to robberies or burglaries in progress or attempting to apprehend suspects in these crimes, and 21 percent were attempting arrests for other crimes. Twelve percent of the assaults occurred while officers were engaged in the handling, transporting, or custody of prisoners; 11 percent while enforcing traffic laws; and 8 percent while investigating suspicious persons. The remainder were attacked while performing other various duties.

Type of Assignment

Table 71 shows the types of assignment of officers assaulted. Forty-eight percent were in one-officer vehicles, 32 percent in two-officer vehicles, 6 percent on detective or special assignments, and 14 percent on other assignments. Vehicle patrol officers were victims in 80 percent of all assaults on officers.

Clearances

Ninety-three percent of the assaults on law enforcement officers reported in 1979 were cleared. In terms of population grouping, cities with populations ranging from 10,000 to 49,999 had the highest clearance rate, 95 percent.

By activity, the highest clearance percentages for all agencies were recorded for assaults on officers responding to disturbance calls. Ninety-five percent of these offenses were cleared. The lowest clearance rate (66 percent) was reported for ambush attacks on officers. Table 72 shows the percentage of assaults cleared by type of activity and population group.

LAW ENFORCEMENT OFFICERS KILLED

In 1979, 106 local, county, state, and Federal law enforcement officers were feloniously killed as compared to 93 in 1978. During the 10-year period, 1970–1979, 1,143 officers were slain. It should be noted that the collection of statistics regarding officers killed in the line of duty was expanded in 1971 to include United States' territories (Puerto Rico, the Virgin Islands, and Guam). Also, the gathering of data on slain Federal officers was begun in 1972. Therefore, 10-year data on officers killed include figures for United States' territories since 1971 and Federal officers since 1972.

Year	*Number of victim officers*
1970	100
1971	129
1972	116
1973	134
1974	132
1975	129
1976	111
1977	93
1978	93
1979	106
Total	1,143

Geographic Locations

As in previous years, more officers (49) were slain in 1979 in the country's most populous region, the South, than in any other. Twenty-three officers were killed in the Western States, 16 in the North Central States, 13 in the Northeastern States, 3 in Puerto Rico, and 2 in Guam. The accompanying chart shows the number of law enforcement officers killed in the geographic regions during each of two successive 5-year periods, 1970–1974 and 1975–1979. Information on officers feloniously killed in 1979 by geographic division and population group is presented in the following table.

Of the 106 officers slain during 1979, 101 were from 87 different local, county, state, and Federal law enforcement agencies in 30 states. As indicated above, the remaining 5 were from Puerto Rico and Guam. Among the states, California, with 10 officers slain, lost more officers in line-of-duty deaths than any other. The State of Texas followed with 8 officers killed.

Circumstances Surrounding Deaths

During the year, 19 officers were slain by persons engaged in the commission of a robbery or during the pursuit of robbery suspects, and 7 lost their lives at the scene of burglaries or while pursuing burglary suspects. Twenty-one officers were killed while attempting arrests for crimes other than robbery or burglary.

Ambush situations accounted for 11 officers' deaths in 1979. Seventeen officers were slain responding to disturbance calls (family quarrels, man-with-gun calls, bar fights, etc.) and 15 were killed while enforcing traffic laws. Nine officers lost their lives while investigating suspicious persons or circumstances, 4 while handling mentally deranged persons, and 3 while engaged in the handling, transporting, or custody of prisoners.

Types of Assignment

Seventy-one of the officers slain in 1979 were on patrol duty, and of those, 68 were assigned to vehicles and 3 were on foot patrol. The perils inherent in patrol duties are substantiated by the fact that, in recent years, officers assigned in this capacity have consistently been the most frequent victims of the police killer. The patrol officer is often placed in dangerous situations and must react to circumstances as they occur without the benefit of detailed information or planning. He is repeatedly in contact with suspicious or dangerous individuals, each of whom could constitute a threat to his personal safety.

While possibly not with the same regularity, law enforcement officers assigned in other capacities are confronted with equally tense and dangerous situations. In 1979, 24 officers slain were detectives or on special assignments, and in the highest tradition of the law enforcement profession, 11 officers were off duty but taking appropriate police action in response to a criminal act when murdered.

Of the 95 officers who were on duty when slain during 1979, 46 were alone and unassisted when killed. Forty-two percent (420) of the on-duty officers killed during the period 1970–1979 were alone at the time they were attacked.

Weapons Used

One hundred (94 percent) of the law enforcement officers killed in 1979 were slain with firearms. Seventy-six of these deaths were perpetrated with handguns, 18 with rifles, and 6 with shotguns. Seventeen officers were felled with their own firearms. Of the 6 officers not slain with firearms, 4 were killed with knives, 1 by a bomb, and 1 by a vehicle.

Forty-nine of the officers who met their demise in 1979 attempted to utilize their service firearms while in contact with their assailants, and 27 of these officers discharged their service weapons while attempting to protect themselves. Fifty percent of the officers killed by firearms were within 5 feet of their assailants at the time they were shot.

Day and Hour of Attack

Although, as can be seen from the accompanying data, no one day of the week can be singled out as being significantly more hazardous to a law enforcement officer than any other, it can be stated that more officers are slain during the nighttime hours. From 1970–1979, 43 percent (488) of the 1,143 officers who lost their lives in the line of duty were killed during the 6-hour period, 9 p.m. to 3 a.m.

Law Enforcement Officers Killed, 1970–1979

[By type of weapon]

Type of weapon	1970–1979		1970–1974		1975–1979	
	Total number	Percent	Number	Percent	Number	Percent
Handgun	796	69.6	435	71.2	361	67.9
Rifle	150	13.1	73	11.9	77	14.5
Shotgun	132	11.5	75	12.3	57	10.7
Total firearms	1,078	94.3	583	95.4	495	93.0
Knife	20	1.7	11	1.8	9	1.7
Bomb	9	.8	4	.7	5	.9
Personal weapons	3	.3	1	.2	2	.4
Other (clubs, etc.)	33	2.9	12	2.0	21	3.9
Total	1,143	100.0	611	100.0	532	100.0

The following table shows the number of law enforcement officers killed by day of week for the period 1970–1979.

Day of week	*Number of victim officers*
Sunday	149
Monday	156
Tuesday	148
Wednesday	155
Thursday	172
Friday	187
Saturday	176
Total	1,143

Profile of Victim Officers

Ninety-three (88 percent) of the officers slain during 1979 were White, 10 (9 percent) were Black, and the remaining 3 (3 percent) were of other races. The average years of service for slain officers was 8. Ten percent of the officers killed had 1 year or less of law enforcement experience; 25 percent had more than 1 but less than 5 years of service; 40 percent had 5 through 10 years of experience; and 26 percent had served as law enforcement officers for more than 10 years.

Profile of Victim Officers

Law enforcement officers	1970–1979	1970–1974	1975–1979
Percent White	89	88	90
Percent Black	10	11	9
Percent other race	1	*	1
Average years of service	8	8	8
Percent with 1 year or less of service	12	14	10
Percent with less than 5 years of service	45	48	42
Percent with 5 through 10 years of service	30	27	32
Percent over 10 years of service	25	24	26

*Less than one-half of 1 percent.
Because of rounding, percentages may not add to totals.

Persons Identified

Law enforcement agencies cleared 102 of the 106 killings of police officers which occurred during 1979. In connection with these crimes, 146 offenders were identified, 97 percent of which were male. Of all persons identified, 51 percent were White, 47 percent were Black, and the other 2 percent were of other races. The assailants ranged in age from 15 to 86, and the average age was 29 years. Five percent of the offenders were under the age of 18, and 60 percent were between 18 and 30 years of age.

As can be seen from the accompanying chart, the majority of the assailants were not first-offenders. Sixty-three percent had prior arrests, 49 percent had previous convictions, and 43 percent had been arrested for violent crimes, such as murder, forcible rape, etc. Thirty-six percent of the offenders had at one time been paroled or given probation following criminal convictions, while 16 percent were on parole or probation at the time of the police killing in which they were involved. Persons having prior arrests for narcotic charges made up 13 percent of the total offenders, and 6 percent had previous arrests for police assaults.

During 1979, there were 17 offenders justifiably killed either at the scene of the police killing or in ensuing confrontations. Five of these assailants were killed and an additional 11 were wounded by the victim officers themselves. Four of the offenders committed suicide.

Profile of Persons Identified

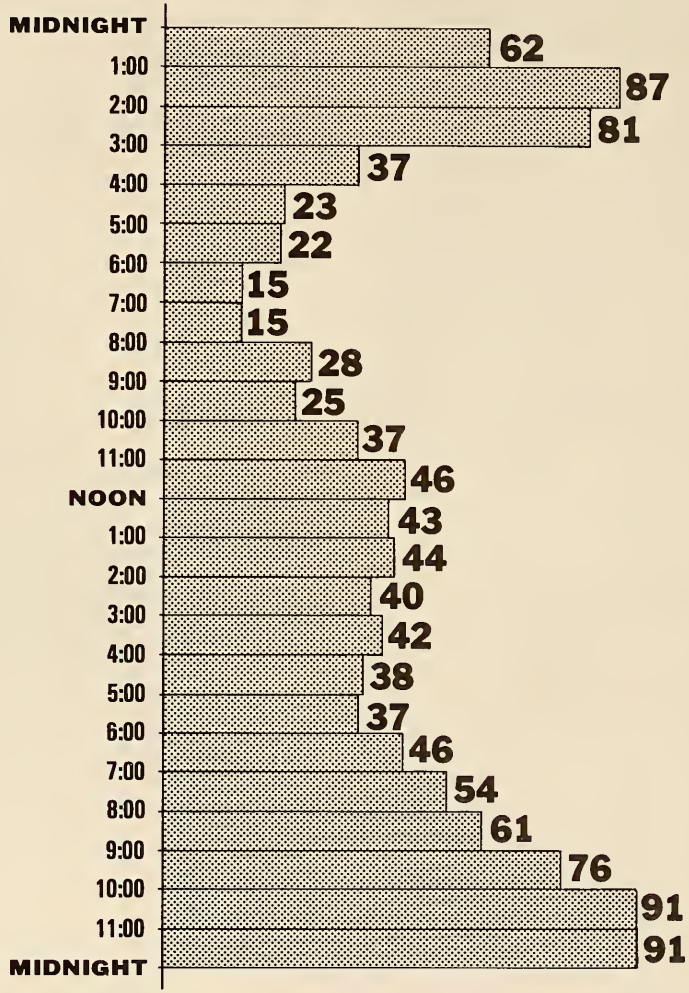
Persons identified	Total	Percent of persons identified	1970–1974	Percent	1975–1979	Percent
TOTAL	**1,604**	**100**	**889**	**100**	**715**	**100**
Under age 18	116	7	60	7	56	8
From 18 to 30 years of age	1,016	63	583	66	433	61
Male	1,540	96	851	96	689	96
Female	64	4	38	4	26	4
White	792	49	393	44	399	56
Black	779	49	488	55	291	41
Other race	33	2	8	1	25	3
Prior criminal arrest	1,139	71	686	77	453	63
Convicted on prior criminal charge	841	52	494	56	347	49
Prior arrest for crime of violence	577	36	364	41	213	30
Convicted on criminal charges—granted leniency	590	37	310	35	280	39
On parole or probation at time of killing	261	16	141	16	120	17
Arrested on prior murder charge	72	4	39	4	33	5
Prior arrest on narcotic drug law violation	270	17	164	18	106	15
Prior arrest for assaulting policeman or resisting arrest	133	8	98	11	35	5
Prior arrest for weapons violation	359	22	213	24	146	20

For the years 1968-1977, the most recent 10-year period for which complete disposition data are available, 1,536 known persons were involved in the killings of 1,094 law enforcement officers. Of these known offenders, 1,280 were arrested and charged with the killings of the officers. The available court disposition data regarding the offenders found guilty of the officers' murders disclosed that 107 were sentenced to death, 407 were sentenced to life imprisonment, and 265 received prison terms ranging from 1 to 2,001 years. Four offenders received probation; 5 received suspended sentences. The sentences of 14 offenders who were found guilty are unknown.

Disposition of Persons Identified in the Killing of Law Enforcement Officers, 1968–1977

	Total	Percent distribution
Known persons	1,536	100
Fugitives	16	1
Justifiably killed	196	13
Committed suicide	44	3
Arrested and charged	1,280	83
Arrested and charged	1,280	100
Guilty of murder	802	63
Guilty of lesser offense related to murder	102	8
Guilty of crime other than murder	105	8
Acquitted or otherwise dismissed	160	13
Committed to mental institution	41	3
Case pending	56	4
Died in custody	14	1

LAW ENFORCEMENT OFFICERS KILLED
Hour of Day
1970-1979



The hour of the day in which two officers were killed is not known.

SECTION VI
APPENDIX I
TABLE METHODOLOGY

This appendix is to assist the reader in understanding the tables presented in this publication. By utilizing the following key, the reader will gain a better understanding of table construction.

Key: A) Column 1 shows the table number. This appendix will refer to Tables 1 through 54, *Crime in the United States—1979.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of agency participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of the above-listed participation levels. For example, Table 1 includes all three agency reporting levels, but Table 14 presents only the data from agencies having reported for the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1979).	Statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1979, estimations. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1979.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1979 statistics are consistent with Table 1, *Crime in the U.S.* Pre-1979 crime statistics have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1979. Population statistics represent July 1 estimations for each year except April 1, 1970. The tabular breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the 10th place for violent crime and 100th place for property crime.	Represents an estimation of national reported crime activity from 1970 to 1979.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1979 statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1979. Population statistics represent July 1 estimations for each year. The tabular breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1979).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1979, population estimations. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at state level. Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1979).	Statistics are published for all Standard Metropolitan Statistical Areas (SMSAs) having at least 75% reporting. Figures are listed for central cities of the SMSAs if the cities submitted 12 months data in 1979. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1979. Population statistics represent July 1, 1979, estimations. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents an estimation of the reported crime activity for Index offenses at individual SMSA level. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
6	All law enforcement agencies submitting complete reports for all months in 1979.*	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The population is based on July 1, 1979, population estimations of each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparisons of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for all months in 1979.*	Student enrollment figures are adjusted by converting part-time students into full-time equivalents (FTEs) as provided by the National Center for Education Statistics of the U. S. Department of Health, Education, and Welfare. FTEs are computed by taking the fraction of part-time students by the prescribed method in the "Higher Education General Information Survey (HEGIS XII)."	Represents reported crime and FTEs of individual university/college law enforcement agencies listed alphabetically by state. Totals are supplied for violent and property crimes.
8	All law enforcement agencies submitting complete reports for all months in 1979.*	"Suburban Counties" are defined to be the area covered by all noncity agencies within an SMSA (App. III).	Represents crime reported to individual police agencies in suburban counties. Any comparison of UCR statistics should take into consideration demographic differences.
9	All law enforcement agencies submitting complete reports for all months in 1979.*	"Rural Counties" are those outside SMSAs and not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1979, population estimations of individual agencies.	Represents crime reported to individual police agencies in rural counties over 25,000 population. Any comparison of UCR statistics should take into consideration demographic differences.
10, 11, 12, 13	All law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	The 1979 crime trend statistics are 2-year comparisons based on 1979 reported crime activity. Only common reported months for individual agencies are included in 1979 trend calculations. Populations represent July 1, 1979, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban Cities" represents all city agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14, 15, 16, 17	All law enforcement agencies submitting complete reports for all months in 1979.	The 1979 crime rates are the ratios of the aggregated 1979 crime volumes and the aggregated 1979 populations of the contributing agencies. Population statistics represent July 1, 1979, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban" represents all city agencies other than core cities in SMSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1979.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1978 and 1979.	Aggravated assault is excluded from the table because, for UCR Program purposes, if money or property is taken in connection with an assault, the offense becomes a robbery.
20, 21, 22, 23	All law enforcement agencies submitting complete reports for at least 6 months in 1979.	The 1979 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1979. Population statistics represent July 1, 1979, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	

*The numbers in parentheses indicate the number of months for which arson data were received. Arson figures are not shown if reports for less than 6 months were received.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months for 1979).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). A corresponding population is used when less than 12 months are used. The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 25) divided by the percent of total group population reporting (as estimated for July 1, 1979). For example, in the Rural Area, agencies reporting, including those submitting less than 12 months, represent 47,872 burglary arrests and 84.2% of the total rural population. The rural burglary arrest total is estimated to be: $\frac{\text{Reported volume}}{\text{\% population}} \times 100$ $\frac{47{,}872}{84.2} \times 100 = 56{,}855$	
25	All law enforcement agencies submitting at least 6 months in 1979.	The 1979 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1979 reported arrest statistics and equivalent population. The population statistics represent the July 1, 1979, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
26, 27	All law enforcement agencies submitting annual reports in 1970 and all months in 1979.	The arrest trends are the percentage differences between 1970 and 1979 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1979, estimations.	
28, 29	All law enforcement agencies submitting complete reports for at least 6 common months in 1975 and 1979.	The arrest trends are the percentage differences between 1975 and 1979 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1979, estimations for individual agencies.	
30, 31	All law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	The arrest trends are 2-year comparisons between 1978 and 1979 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1979, estimations of individual agencies.	
32, 33, 34, 35	All law enforcement agencies submitting complete reports for at least 6 months in 1979.		Slight decrease in coverage for Table 35 due to editing procedure and lower submission of race data.
36	All city law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	The 1979 city arrest trends represent the percentage differences between 1978 and 1979 arrest volumes aggregated from common city agencies. "City agencies" are defined to be all agencies within Population Groups I-VI (App. III).	

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
37, 38, 39	All city law enforcement agencies submitting reports for at least 6 months in 1979.	"City agencies" are defined to be agencies within Population Groups I-VI (App. III).	
40	All city law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	The 1979 city arrest trends represent the percentage differences between 1978 and 1979 arrest volumes aggregated from common city agencies. "City agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41	All city law enforcement agencies submitting complete reports for at least 6 months in 1979.	"City agencies" are defined to be agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 41 due to editing procedure and lower submission of race data.
42, 46	All suburban law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	1979 suburban arrest trends represent percentage differences between 1978 and 1979 arrest volumes aggregated from contributing agencies. "Suburban area" is defined as all counties and cities with fewer than 50,000 inhabitants within SMSAs (App. III).	
43, 44, 45, 47	All suburban law enforcement agencies submitting reports for at least 6 months in 1979.	"Suburban area" is defined to be counties and cities with less than 50,000 population within SMSAs (App. III).	Slight decrease in coverage for Table 47 due to editing procedure and lower submission of race data.
48, 52	All rural law enforcement agencies submitting complete reports for at least 6 common months in 1978 and 1979.	1979 rural trends represent percentage differences between 1978 and 1979 volumes aggregated from contributing agencies. "Rural area" is defined to be all noncity agencies outside SMSAs (App. III).	
49, 50, 51, 53	All rural law enforcement agencies submitting complete reports for at least 6 months in 1979.	"Rural area" is defined to be noncity agencies outside SMSAs (App. III).	Slight decrease in coverage for Table 53 due to editing procedure and lower submission of race data.
54	All law enforcement agencies submitting complete reports for at least 6 months in 1979.	Population statistics represent July 1, 1979, estimations of individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II crimes. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Arrest data are reported for Part I and Part II offenses.

The Part I offenses are as follows:

1. **Criminal homicide.**—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. **Forcible rape.**—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

3. **Robbery.**—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

4. **Aggravated assault.**—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. **Burglary—breaking or entering.**—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. **Larceny-theft (except motor vehicle theft).**—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. **Motor vehicle theft.**—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. **Arson.**—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

9. **Other assaults (simple).**—Assaults or attempted assaults where no weapon was used or which did not result in serious or aggravated injury to the victim.

10. **Forgery and counterfeiting.**—Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. **Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks except forgeries and counterfeiting.

12. **Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property, including attempts.

14. **Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

15. **Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

16. **Prostitution and commercialized vice.**—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape and offenses

against chastity, common decency, morals, and the like. Attempts are included.

18. **Drug abuse violations.**—State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

19. **Gambling.**—Promoting, permitting, or engaging in illegal gambling.

20. **Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**—State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

23. **Drunkenness.**—Drunkenness or intoxication. Excluded is "driving under the influence" (offense 21).

24. **Disorderly conduct.**—Breach of the peace.

25. **Vagrancy.**—Vagabondage, begging, loitering, etc.

26. **All other offenses.**—All violations of state or local laws, except offenses 1–25 and traffic offenses.

27. **Suspicion.**—No specific offense; suspect released without formal charges being placed.

28. **Curfew and loitering laws.**—Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. **Runaways.**—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

UNIFORM CRIME REPORTING AREA DEFINITIONS

Standard Metropolitan Statistical Area

The geographic presentation of Uniform Crime Reporting (UCR) data consistently relies on the concept of the Standard Metropolitan Statistical Area (SMSA). Comprehension of this term is crucial to understanding the related UCR concepts of "Other Cities" and "Rural Area" to be discussed later in this appendix.

An SMSA is a statistical construct used to define metropolitan areas in a uniform manner. It is an integrated economic and social unit with a recognized large population nucleus. The SMSA concept was developed to facilitate the analysis and dissemination of statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal statistical agencies to utilize the same boundaries when publishing statistical data.

An SMSA always includes a central city (cities) of specified population (generally over 50,000) and the county (counties) in which it is located. In addition, an SMSA also includes contiguous counties when the economic and social relationship between the central and contiguous counties meet specified criteria of metropolitan character and integration. An SMSA may cross state lines. In New England, SMSAs are composed of cities and towns instead of counties.

The Office of Federal Statistical Policy and Standards of the U. S. Department of Commerce has responsibility for designating and defining SMSAs. It in turn is advised by the Federal Committee on Standard Metropolitan Statistical Areas. The detailed criteria followed in establishing and defining SMSAs can be found in the U. S. Department of Commerce publication, *Standard Metropolitan Statistical Areas,* revised edition 1975.

Community Types

Uniform Crime Reporting data are often presented using three community type aggregations. These are SMSA, Other Cities, and Rural Area.

SMSAs as used in this publication made up approximately 73 percent of the total United States' population in 1979. A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the SMSA. Suburban areas, therefore, can be subdivided into suburban cities and suburban counties.

Other Cities are those outside SMSAs. Most of these places are incorporated and comprised 12 percent of the 1979 population of the United States.

A Rural Area is that portion of a county outside the SMSA excluding areas covered by city police agencies. For crime reporting purposes, rural areas are made up of unincorporated portions of counties outside urban places and SMSAs. They comprised 15 percent of the 1979 national population.

The following diagram illustrates the aforementioned discussion of the community types. [1]

<table>
<tr><td></td><td>SMSA</td><td>NON-SMSA</td></tr>
<tr><td rowspan="2">CITIES</td><td>CITIES OVER 50,000</td><td rowspan="2">OTHER CITIES</td></tr>
<tr><td>SUBURBAN CITIES</td></tr>
<tr><td>COUNTIES (unincorporated area)</td><td>SUBURBAN COUNTIES</td><td>RURAL AREA</td></tr>
</table>

Population Groups

For purposes of statistical presentation, the cities and counties in the United States are divided into groups based on population size. The population group classifications used by the UCR Program are as follows:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural Area)	County	N/A
IX (Suburban County)	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation,

[1]In New England, "town" instead of "county" is used to describe SMSAs. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic areas are used in tabulations for New England since they encompass an entire county or counties.

municipal incorporation, etc. The following table shows the number of UCR contributing agencies within each population group for 1979:

Population Group	*Number of Agencies*
I	58
II	111
III	291
IV	638
V	1,599
VI	7,614
VIII (Rural Area)	3,736
IX (Suburban County)	1,392
Total	15,439

Regions and Divisions

Geographically, the United States is divided into four regions: the Northeastern States, the North Central States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England
- Connecticut
- Maine
- Massachusetts
- New Hampshire
- Rhode Island
- Vermont

Middle Atlantic
- New Jersey
- New York
- Pennsylvania

NORTH CENTRAL STATES

East North Central
- Illinois
- Indiana
- Michigan
- Ohio
- Wisconsin

West North Central
- Iowa
- Kansas
- Minnesota
- Missouri
- Nebraska
- North Dakota
- South Dakota

SOUTHERN STATES

South Atlantic *
- Delaware
- Florida
- Georgia
- Maryland
- North Carolina
- South Carolina
- Virginia
- West Virginia

East South Central
- Alabama
- Kentucky
- Mississippi
- Tennessee

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

*Includes District of Columbia.

WESTERN STATES

Mountain
- Arizona
- Colorado
- Idaho
- Montana
- Nevada
- New Mexico
- Utah
- Wyoming

Pacific
- Alaska
- California
- Hawaii
- Oregon
- Washington

APPENDIX IV

10-YEAR TRENDS IN CRIME, 1970–1979

This appendix graphically presents quarterly crime data for the 10-year period, 1970-1979, and examines basic crime trends. The approach taken herein supplements percent-change comparisons for two 1-year periods and yields a generalized perspective of the movement of crime.

While a particular offense may possess a substantial number of traits or attributes in common with other crimes, each offense has its own unique patterns and characteristics. Because of the emphasis on the individuality of each crime in the appendix, no higher level of aggregation was introduced.

Quarterly crime rates for each Index offense were computed for the period 1970–1979, utilizing data from agencies having submitted all 12 months of crime reports and the corresponding agency jurisdictional populations. Statistics on arson are not included in the appendix since the collection of data on this crime did not commence until April of 1979. Population figures were not adjusted to account for possible quarterly changes.

The first quarter of 1970 was selected as the base period and the quarterly crime rate corresponding to that period was equated to 100. The "relative" quarterly crime rates resulting from the standardization process are presented in both graphic and tabular form.

In order to eliminate the effect of seasonal fluctuations, 4-quarter moving averages were computed for each Index crime. The results of these computations are presented in both graphic and tabular form. On the graphs, the moving average curves are depicted as smooth dotted lines that pass through the quarterly data.

Murder Trend

During the 10-year period, 1970–1979, the relative crime rates for murder fluctuated between 100 and 153. Although seasonality was not pronounced, murder consistently peaked in the second half of the year throughout the 10-year period under consideration. Yearly highs occurred in the fourth quarter for 5 of the 10 years, occurred jointly in the third and fourth quarters for 3 years, and occurred in the third quarter for 2 years. Overall, there was a gradual increase in murder from 1970 to 1974, followed by a slight decline during 1975 and 1976. A gradual upward trend commenced in 1977 and continued through 1979. It is anticipated that this upward movement will continue into 1980.

Murder Trend by Quarter
1970–1979

Year	Quarter	Relative Crime Rate	Moving Average	Year	Quarter	Relative Crime Rate	Moving Average
1970	1 January-March	100	106	1975	1 January-March	134	138
	2 April-June	106	108		2 April-June	128	136

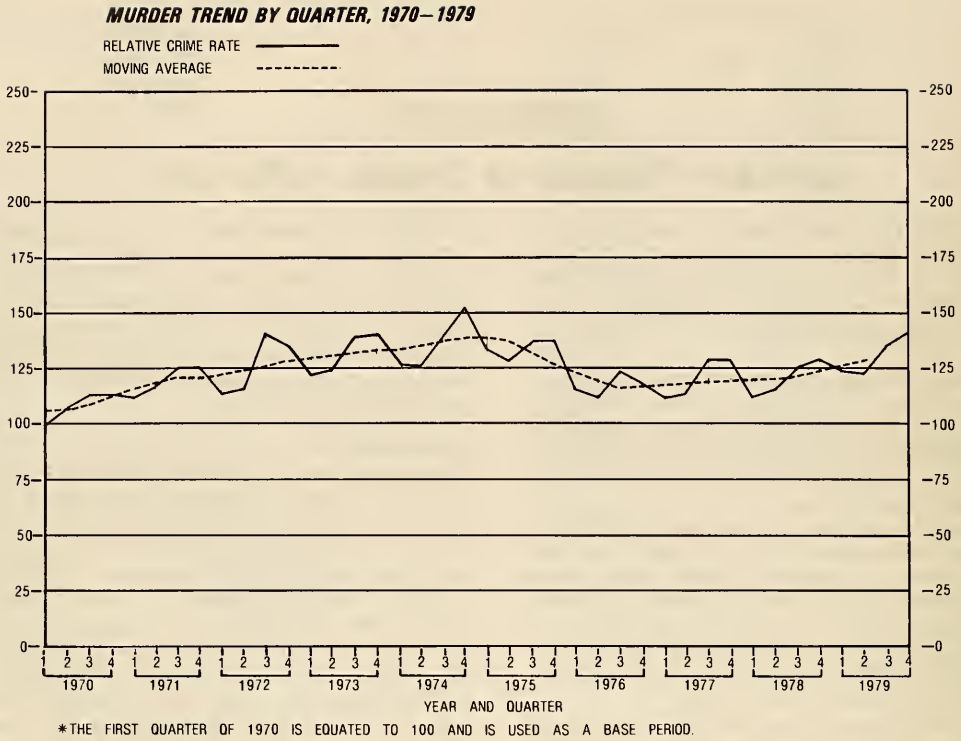
	4 October-December	153	138		4 October-December	140	*

*Final crime data for the first and second quarters of 1980 are not available for computing moving averages for the last two quarters of 1979.



Forcible Rape Trend

Between 1970 and 1979, the relative crime rate for forcible rape ranged from 100 to 221. The low occurred in the first quarter of 1970, while the high was reached in the third quarter of 1979. Forcible rape invariably peaked in the summer months and was lowest in the winter months of the year. As can be seen from the accompanying chart, quarterly forcible rape rates are distinguished by undulations with pointed peaks and troughs.

The moving average indicated (except for a slight decline during 1975 and 1976) a steady increase between 1970 and 1979. Further, forcible rape showed the highest increase among all Crime Index offenses during the past decade. The trend has shown no sign of mitigating.

Forcible Rape Trend by Quarter
1970–1979

Year	Quarter	Relative Crime Rate	Moving Average	Year	Quarter	Relative Crime Rate	Moving Average
1970	1 January-March	100	112	1975	1 January-March	133	156

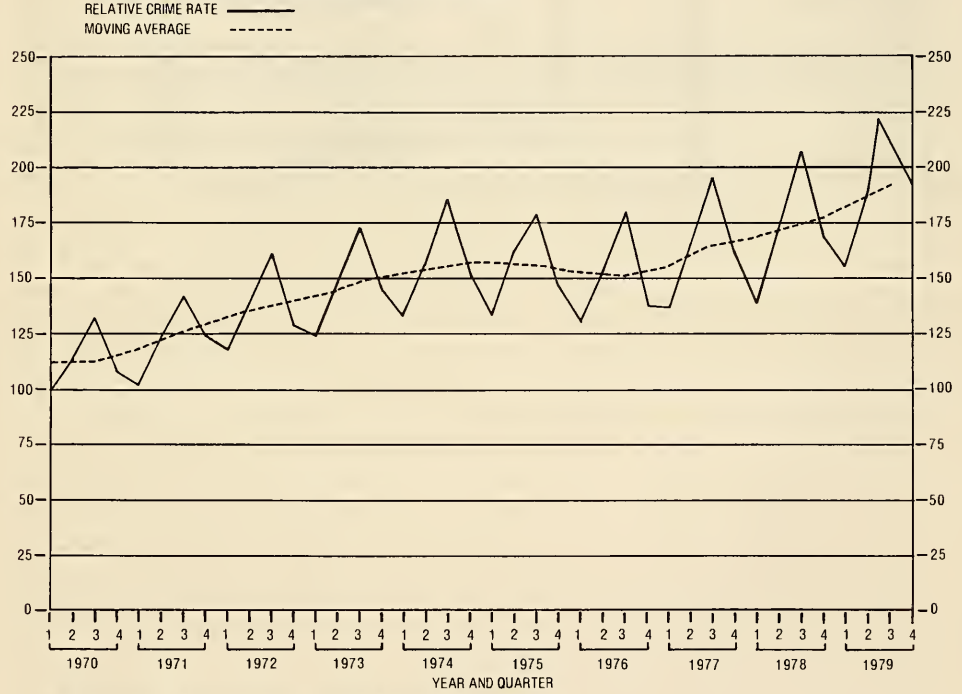
*Final crime data for the first and second quarters of 1980 are not available for computing moving averages for the last two quarters of 1979.

FORCIBLE RAPE TREND BY QUARTER, 1970–1979



* THE FIRST QUARTER OF 1970 IS EQUATED TO 100 AND IS USED AS A BASE PERIOD.

Robbery Trend

From 1970 to 1979, the relative crime rate for robbery varied between 91 and 152. The high was reached in the fourth quarter of 1974, while the low occurred in the second quarter of 1978. Although seasonality was generally mild, robbery consistently peaked in the fourth quarter and bottomed out in the second quarter of the year. It will be noted that the configuration of quarterly robbery rates is generally characterized by single peaks and troughs.

According to the moving average figures, there was a period of relative stability between 1970 and 1973. The robbery trend began to increase toward the end of 1973 and continued to rise until the close of 1974. This upward movement was followed by a steady decline between 1975 and 1977, which gave way to an upward trend that lasted into 1979. This latter trend increase, however, has not yet reached the peak experienced in 1974.

Robbery Trend by Quarter 1970–1979

Year	Quarter	Relative Crime Rate	Moving Average	Year	Quarter	Relative Crime Rate	Moving Average
1970	1 January-March	100	100	1975	1 January-March	132	131
	2 April-June	95	104		2 April-June	114	130

* THE FIRST QUARTER OF 1970 IS EQUATED TO 100 AND IS USED AS A BASE PERIOD.

Aggravated Assault Trend

During the decade, 1970 to 1979, the relative crime rate for aggravated assault oscillated between 100 and 201. The rate was lowest in the first quarter of 1970 and reached a peak in the third quarter of 1979. Aggravated assault was consistently highest in the third quarter and lowest in the first quarter of each year. A review of the accompanying graph shows that undulations for quarterly aggravated assault rates were marked by single peaks and troughs.

The moving average trend generally displayed a steady upward movement, commencing in the first quarter of 1970 and continuing through the end of 1979. This steady increase shows no signs of abating.

Aggravated Assault Trend by Quarter
1970–1979

*THE FIRST QUARTER OF 1970 IS EQUATED TO 100 AND IS USED AS A BASE PERIOD.

Burglary Trend

The relative crime rate for burglary fluctuated between 99 and 148. Burglary peaked in the second half of each year throughout the entire decade under study. In reviewing the graph, it will be observed that the burglary trend data were generally characterized by dual peaks and troughs.

The moving average curve began to rise in 1973. This uptrend lasted until the end of 1974, at which time the data began to show a decline. This decrease continued until the end of 1976, after which the curve remained relatively stable.

Burglary Trend by Quarter 1970–1979

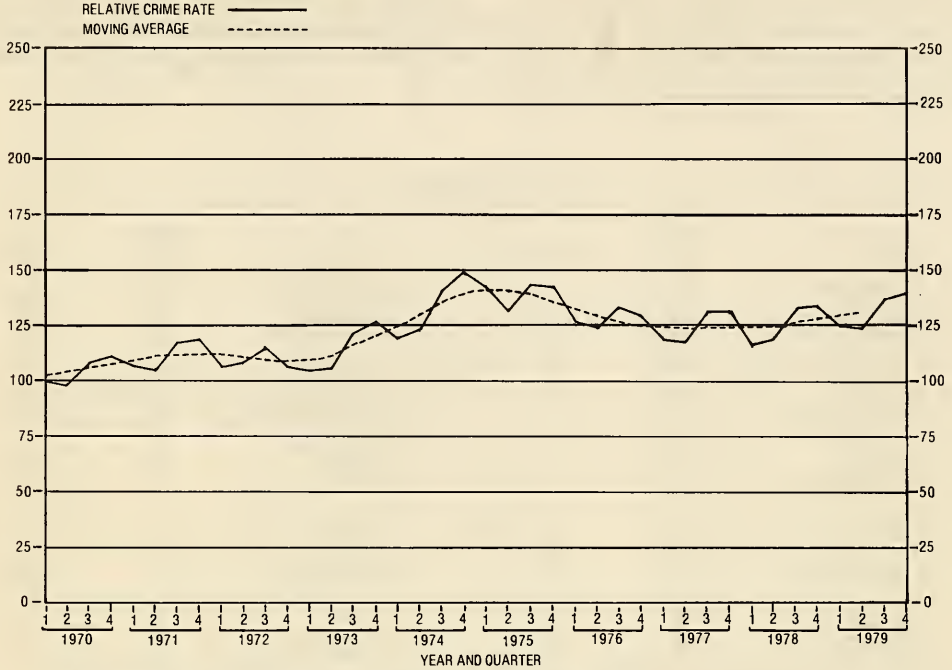
BURGLARY TREND BY QUARTER, 1970–1979



*THE FIRST QUARTER OF 1970 IS EQUATED TO 100 AND IS USED AS A BASE PERIOD.

Larceny-theft Trend

Larceny-theft relative crime rates fluctuated between 92 and 160 during the years 1970 to 1979. The low occurred in the first quarter of 1973, while the high was reached in the third quarters of 1975 and 1979. Larceny-theft consistently peaked in the third quarter of each year and bottomed out in the first quarter of all years but 1976, when the annual low occurred in the fourth quarter. Generally, the configuration of quarterly larceny-theft rates was characterized by singular peaks and troughs.

The moving average curve for larceny-theft began to rise at the start of 1973 and continued its ascent until early 1976. Subsequently, a 2-year decline was experienced, but a rise again ensued, commencing in 1978 and continuing into 1979.

Larceny-theft Trend by Quarter 1970–1979

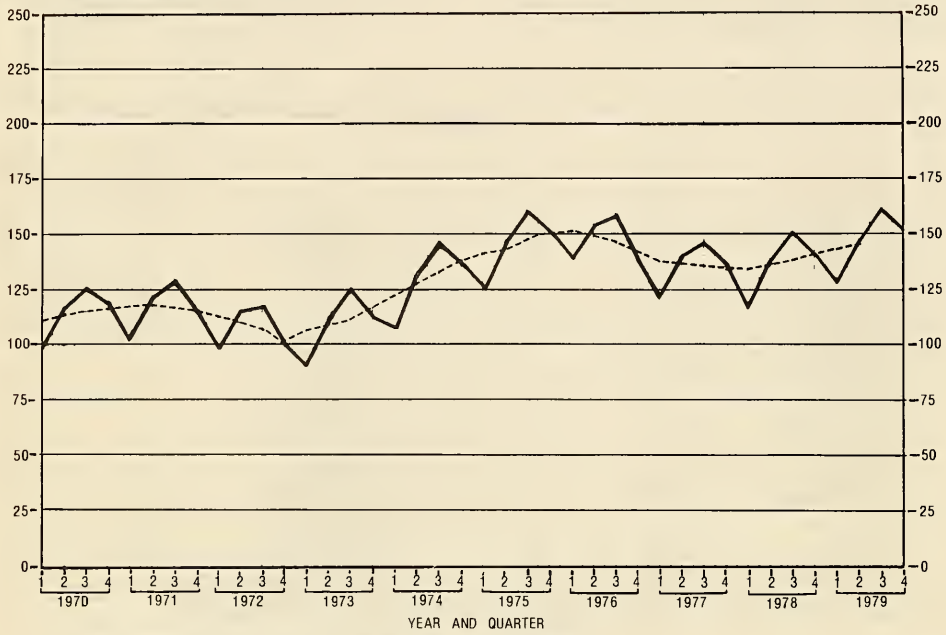
LARCENY—THEFT TREND BY QUARTER, 1970—1979



*THE FIRST QUARTER OF 1970 IS EQUATED TO 100 AND IS USED AS A BASE PERIOD.

Motor Vehicle Theft Trend

The relative crime rates for motor vehicle theft fluctuated between 84 and 112, the lowest range of variation of any Index offense during the 10-year period under study. The low was reached in the first quarter of 1978, while the peak was reached in the fourth quarter of 1970 and the third quarter of 1971. Generally, motor vehicle theft peaked in the third quarter of each year. Only in 1970, when the relative crime rate peaked in the fourth quarter, was this not the case. The low for motor vehicle theft consistently occurred in the first quarter of the year. It will be noted from a review of the graph that the relative crime rate data are characterized by dual peaks and single troughs, a departure from the types of configurations distinguishing the other Index crimes.

The moving average trend was generally stable throughout most of the decade under review.
